

SPRINKLER & IRRIGATION BEST PRACTICES

It's just dirt, right?

Follow these watering and irrigation best practices to help prevent runoff of soil, pesticides, and fertilizers.

- Maintain sprinkler heads and irrigation systems to prevent unnecessary water loss.
- Don't water in the rain or freezing temperatures.
- Water at the right time of day.
- Refer to the label for pesticides and fertilizers to make sure you are applying them correctly and watering at the right time.
