**North Central Texas Council of Governments (NCTCOG)
SMARTe Webinar Series: How Telematics Can Be Used to Reduce Costs
Thursday, September 14, 2023
11:00 AM – 12:00 PM (Central Time)**

Join Zoom Meeting

Please register using the following link.

<https://nctcog.zoom.us/j/86888946765>

Meeting ID: 868 8894 6765

- 1. 11:00 – 11:05 AM** **Welcome, Introduction**
Presenter: Trey Pope, Air Quality Planner, NCTCOG

- 2. 11:05 – 11:40 AM** **Telemetry for Cost and Emissions Savings**
Presenter: Mary Till, Director of Business Development, Sawatch Labs

The presence of telematics among transport and fleet operations offers a multifaceted solution which can produce positive changes in performance. Mary will inform presenters on how fleets can leverage available GPS and telematics functions to accurately observe vehicle-specific operations, model energy demands and operational impacts of replacing gas and diesel vehicles with an electric version. Once electric vehicle (EV) suitability has been determined, one can also project where, when, and how long vehicles will need to charge. This data informs the right-sized charging infrastructure at each site location for short-term and long-term planning.

- 3. 11:40 – 11:50 AM** **Discussion**
Presenter: Jason Brown, Principal Air Quality Planner, NCTCOG

An opportunity for anyone to ask any questions of the presenter about the content shared.

- 5. 11:50 – 12:00 PM** **Local Updates and Close**
