To be considered domestic, all steel and iron used and all products manufactured from steel and iron must be produced in the United States and all manufacturing processes, including application of a coating, for these materials must occur in the United States. Coating includes all processes which protect or enhance the value of the material to which the coating is applied. This requirement does not preclude minimal use of foreign steel, and iron materials that does not exceed one-tenth of one percent of the total contract cost or \$2,500, whichever is greater.
