Presentation with North Central Texas Council of Governments
November 2019

The Problem of Tampering & Aftermarket Defeat Devices

They cause **excess emissions** of NO_x, PM and other pollutants.

They are **prevalent nationwide**. Contributing factors:

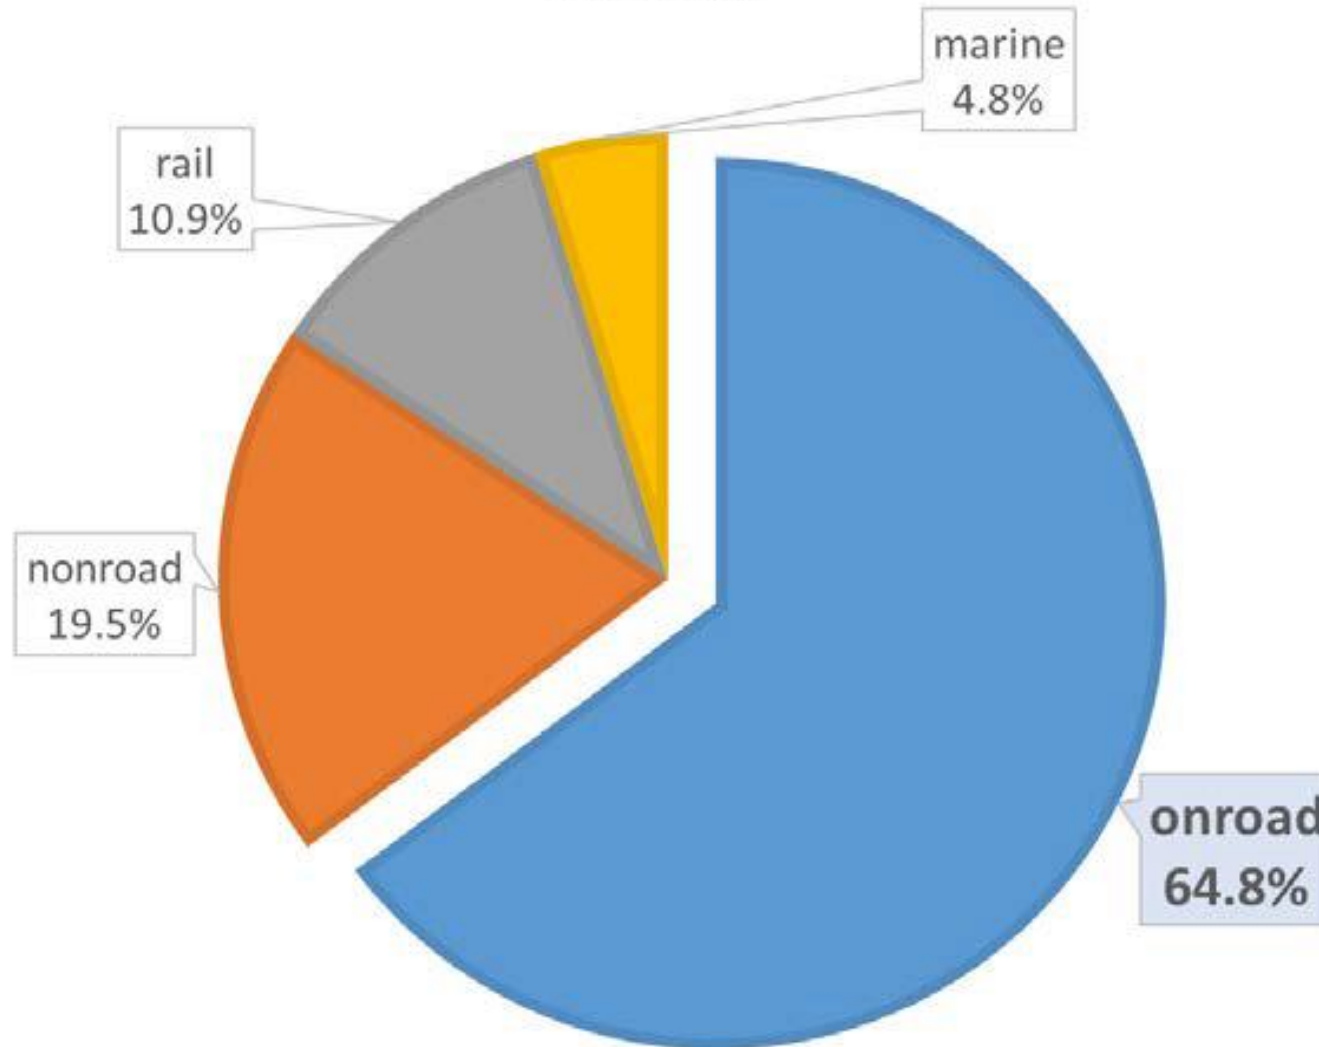

- tightened emission standards;
- steady demand from vehicle and engine owners who want to remove emissions controls (often for the purposes of increasing performance or avoiding maintenance costs);
- technological advancement of aftermarket electronic devices; and
- many who profit from manufacturing, selling, and installing aftermarket defeat devices.

NOx Emission Standards and Controls – Diesel Trucks

Source: <https://nepis.epa.gov/Exe/ZyPDF.cgi?Dockey=P100OA01.pdf>

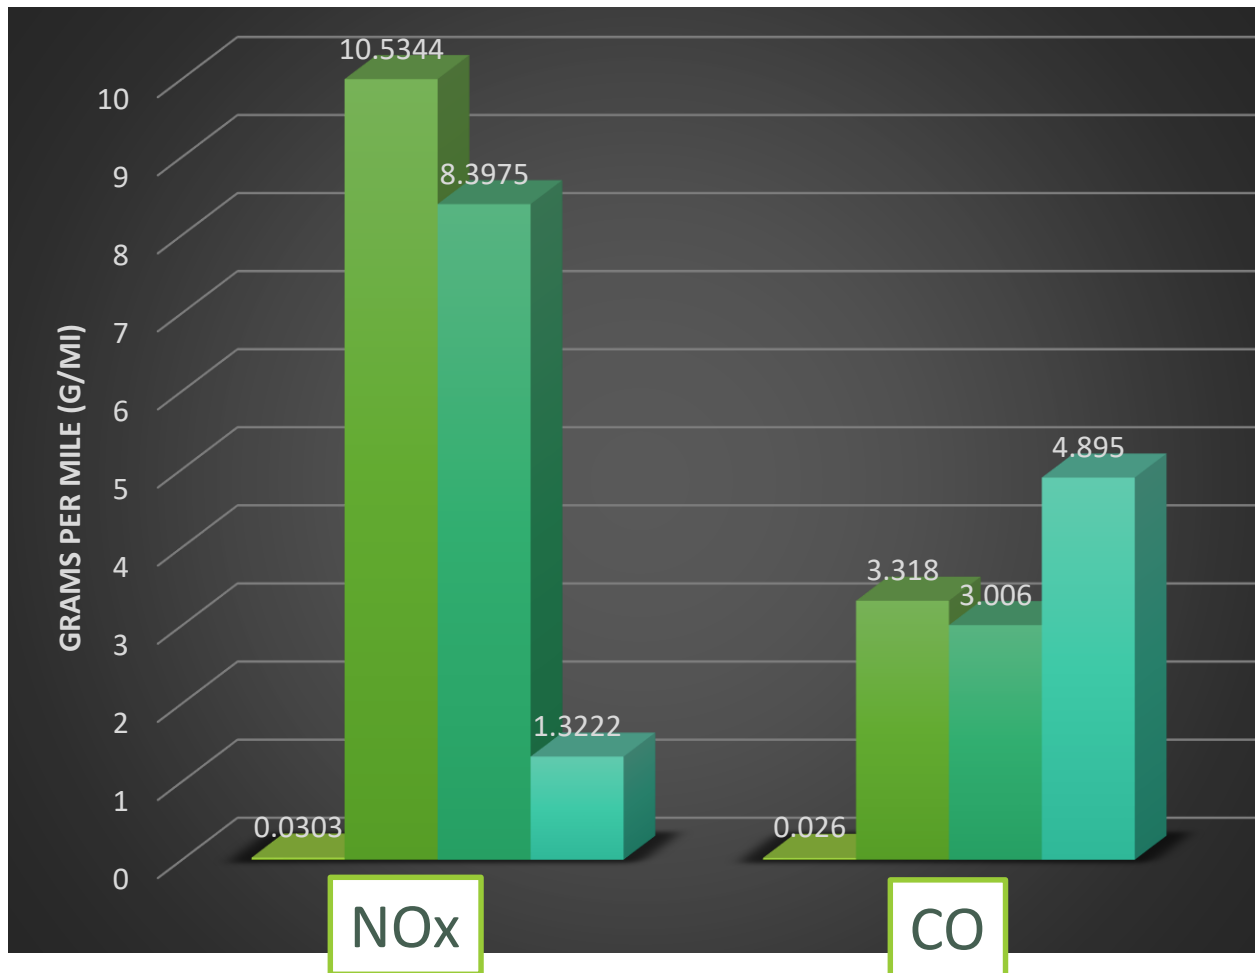

NOx Emissions Increases Due to Full Delete Tier Zero

EPA Tuner Emissions Tests

2011 Ford F-250 6.7 Diesel Powerstroke

- First test: stock
- Second and Third test: EGR electronically disabled by tuner. DOC, DPF, and SCR replaced with straight pipe and disabled by tuner in calibration.
- Fourth Test: EGR not disabled electronically by tuner. DOC, DPF, and SCR replaced with straight pipe and disabled by tuner in calibration.

Emissions Increase Due to Full Delete

NO_x increased ~310x

NMHC increased ~1,140x

CO increased ~120x

PM increased ~40x

These test results show the increase in NO_x, NMHC, CO, and PM when a tuner enables the full removal of emissions controls (i.e., “a full delete”). These tests were conducted without the SCR, DPF, DOC, and EGR emission controls.

Nationwide?

- Hard to say
- Evidence from recent EPA investigations concerning diesel pickup trucks (“trucks”) show cause for concern → →
- This is only the tampering the EPA has identified during recent investigations concerning diesel pickup trucks and is not an estimate of nationwide tampering rates.

It's not just pickup trucks . . .

- EPA investigations find tampering and aftermarket defeat devices for heavy-duty trucks, light-duty cars, agriculture equipment, forestry equipment, construction equipment, and more.
- Like diesel pickup trucks, tampering takes these vehicles and engines from today's standards **back to "tier zero."**

Types of Defeat Devices:

Exhaust Gas Recirculation Delete Hardware

Includes:

- EGR block off plates
- EGR cooler deletes

Calibration modification typically required

- Disable OBD diagnostics
- Disable EGR operation

EGR electronic disablement (all EGR parts present and sensors plugged in)

Types of Defeat Devices: Exhaust Aftertreatment Delete Pipes

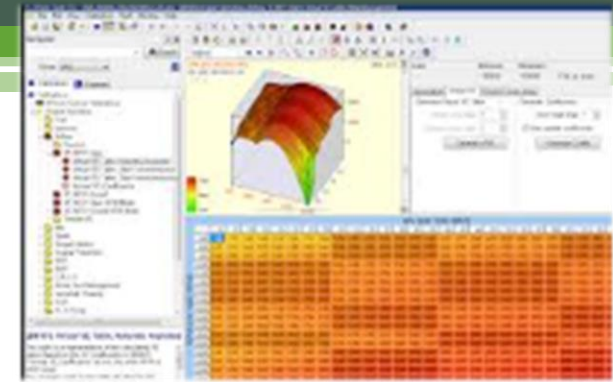

- “Straight” pipes, “Turbo back” pipes or “Downpipe back” pipes.
- Replaces stock exhaust system, including the necessary filters and catalysts.
- Calibration modification typically required to disable OBD diagnostics, sensors and other operations

Types of Defeat Devices:

Tuners and Tunes

- Tuning = Hacking into and modifying software and calibration file(s)
- Typically installed using a “tuner” through the vehicle’s data link connector
- Tuning is required to
 - make engine operate after removal of EGR , filters and catalyts.
 - prevent OBD from activating the check engine light and/or limp mode
- Even with EGR , filters and catalyts intact, tuning can substantially increase tailpipe emissions of NOx

Clean Air Act Civil Prohibitions: Defeat Devices

The following acts and the causing thereof are prohibited –

- For any person to manufacture or sell, or offer to sell, or install, a part or component for a motor vehicle, where
 - A principle effect of the part or component is to bypass, defeat, or render inoperative any emission control device, and
 - The person knows or should know that such part or component is being offered for sale or installed for such use or put to such use.

CAA § 203(a)(3)(B), 42 U.S.C. § 7522(a)(3)(B).

Clean Air Act Civil Prohibitions: Tampering

The following acts and the causing thereof are prohibited –

- For anyone to remove or render inoperative an emission control component on a certified motor vehicle or engine prior to sale or delivery to ultimate purchaser, or
- For anyone to knowingly remove or render inoperative any emission control component on a certified motor vehicle or engine after sale and delivery to the ultimate purchaser.

CAA § 203(a)(3)(A), 42 U.S.C. § 7522(a)(3)(A).

Clean Air Act Criminal Prohibitions

It is a crime to knowingly falsify, tamper with, render inaccurate, or fail to install any “monitoring device or method” required under the CAA.

CAA § 113(c)(2)(C), 42 U.S.C. § 7413(c)(2)(C).

Vehicle Onboard Diagnostics (OBD) are a “monitoring device or method” required by the CAA.

San Marcos Companies and Executives Charged with Tampering with Emission Control Devices on Diesel Truck Fleet

Assistant U.S. Attorney Melanie K. Pierson (619) 546-7976 

NEWS RELEASE SUMMARY – April 11, 2019

SAN DIEGO – A federal grand jury in San Diego today returned a six-count indictment charging three San Marcos companies, two managers and a technician with various felonies related to tampering with emission control devices on heavy-duty diesel trucks.

Diamond Environmental Services LP, Diamond Maintenance Services, LLC and Diamond Solid Waste, Inc. (collectively “Diamond”) of San Marcos, California, plus owner and manager Arie Eric De Jong III, manager Warren Van Dam and technician Jorge Leyva Rodriguez of ECM Diesel Programming were charged with conspiring to manipulate the electronic control module (ECM) on Diamond’s fleet of heavy duty diesel trucks. The alleged manipulation was designed to disable the monitoring system that would

National Compliance Initiative 2020-2023: *Stopping Aftermarket Defeat Devices for Vehicles and Engines*

This NCI will focus on stopping the manufacture, sale, and installation of defeat devices on vehicles and engines used on public roads as well as on nonroad vehicles and engines.

This NCI aligns with the Agency Strategic Plan.

- ✓ “Improving Air Quality.” This NCI will directly address huge sources of excess NO_x and PM which appear to contribute to ozone nonattainment.
- ✓ “Enhanced collaboration with state[s] . . . using the full range of compliance assurance tools.” EPA will engage with states to help get ahead of this problem.
- ✓ “Compliance with the Law . . . EPA will focus resources on direct implementation responsibilities and the most significant violations, . . . examples include the Clean Air Act mobile source program.”

Tampering & Aftermarket Defeat Devices, USA EPA, September 2019

National Compliance Initiative 2020-2023: *Stopping Aftermarket Defeat Devices for Vehicles and Engines*

EPA is launching this NCI in response to calls from states.

“NACAA also offered that EPA should consider an additional NCI focused on compliance by mobile sources with applicable laws and regulations.”
(NACAA comment on NCIs)

“AAPCA members have previously expressed concern to U.S. EPA OECA about emission systems tampering... U.S. EPA OECA should work with air agencies to prioritize curtailing the manufacture and installation of these devices, particularly in areas that do not currently meet the NAAQS for fine particulate matter and ozone.”
(AAPCA comment on National Program Guidance)

EPA Enforcement Is Building off Ongoing Success

Since 2014:

- ✓ 40+ resolved civil cases
- ✓ Addressing over 1 million aftermarket defeat devices

<https://www.epa.gov/enforcement/clean-air-act-vehicle-and-engine-enforcement-case-resolutions>

Focus on **supply side**:

- ✓ National in scope, biggest impact
- ✓ Parts manufacturers, retailers, commercial fleets, tampering shops

Defeat Device Industry Overview

EPA Compliance Assistance

Outreach and education are needed for awareness.

Compliance assistance largely based on **EPA civil enforcement policy:**

- ✓ enforcement discretion, not a regulation, and creates no legal obligations
- ✓ outlines steps companies may take to ensure they do not become subject to enforcement
- ✓ EPA does not preapprove aftermarket products

EMISSIONS-RELATED PARTS

REPORT PROBLEMS

BEFORE YOU SELL...

Have proof that the parts will not increase emissions (for example, emissions test results or an Executive Order from California Air Resources Board demonstrating no illegal emissions increase for the intended use of the part).

BEFORE YOU INSTALL...

Have proof that the vehicle will be returned to its original, stock configuration after installation; or

Have proof that the parts will not increase emissions.

If you suspect someone is manufacturing, selling or installing illegal defeat devices, or is tampering with emissions controls, tell the EPA by writing to:

tampering@epa.gov

TAMPERING POLLUTES OUR AIR

Do not remove or alter emission controls on any EPA-certified vehicle, engine, or piece of equipment.

Emissions controls are all parts that may affect emissions, such as catalytic converters, filters, the electronic control unit, the fuel system, and the onboard diagnostic system.

Keep our air clean and ensure you won't be subject to penalties.

WHY IS TAMPERING ILLEGAL?

DOES THIS AFFECT ME?

Emissions controls prevent respiratory disease, premature death, and environmental harm.

EPA enforces these prohibitions to protect public health and the environment.

These prohibitions apply to anyone who services any emissions-related aspect of any EPA-certified vehicle, engine, or piece of equipment.

These prohibitions also apply to anyone who manufactures, distributes, or installs emissions-related parts.

What drives demand?

Better power
Better Fuel Economy
Customization
“Rolling Coal”
Avoided downtime
Avoided maintenance

All at the
expense of
emissions

“The Livewire TS unlocks your vehicle’s hidden performance by recalibrating your vehicle’s computer for Maximum Horsepower & Torque, Increase Throttle Response, Firmer Shifts and even Increased Fuel Mileage.”

States May Hold Key to Success: **Curtail Demand**

States can curtail the demand for tampering and aftermarket defeat devices

- ✓ Education and outreach
- ✓ Preventing registration of tampered vehicles
- ✓ Deterring vehicle dealers from buying tampered vehicles for resale
- ✓ Enforcement against those who tamper, including commercial fleets and maintenance shops

State Enforcement Authority

- Enforcement of the CAA prohibitions on tampering and aftermarket defeat devices is not delegated to the states.
- But many states have laws:
 - ✓ Prohibiting tampering
 - ✓ Prohibiting operating tampered vehicles
 - ✓ Prohibiting dealers from selling tampered vehicles
- Note preemption provisions and savings clause in CAA § 209
- Authority to inspect and investigate would be based in state law
- State enforcement in federal court? Little precedent, but potential avenues:
 - ➔ Action under CAA § 113 to enforce State Implementation Plan (provided the state law is incorporated into the SIP)
 - ➔ Citizen Suit under CAA § 304, to enforce SIP or prohibited acts in CAA § 203

Report Violations

- ✓ tampering@epa.gov
- ✓ EPA's Report a Violation system:
<https://www.epa.gov/enforcement/report-environmental-violations>
