1. **Welcome and Introductions.**

## **DISCUSSION ITEMS**

2. **Public Works Roundup: SPROW Track.** Group will discuss the SPROW Track at Public Works Roundup and consider whether this is something to continue next year.

The committee discussed that the SPROW Track had great attendance and seemed to support the Public Works Roundup. One complaint was that people didn't like choosing between the tracks. A member suggested that the presentations be filmed and publicly shared as a resource.

3. **SPROW BMP Guidelines Document.** Group will discuss development and structure of a BMP Guidelines document. The Subcommittee will review several resources NCTCOG has compiled for review to determine next steps.

The committee reviewed the roadmap and would like more detail on the topics in the guidebook. The template for the guidebook NCTCOG showed also didn't provide enough space for detail, especially for a section on small cells. However, the committee agreed to start with the template NCTCOG showed and later add in more detail. The committee wants to start with small cells and then move to utilities coordination. A member also suggested linking resources like the roadmap does so people can get as much information as they need. Members requested that NCTCOG send them a link to the roadmap, the template for the guidebook, and the topic list.

4. **SPROW Fiscal Year 2020 Work Program.** Group will discuss what activities to focus on over the Fiscal Year 2020 timeframe.

The committee wants to modify the draft FY2020 SPROW program elements to include all the suggested topics on the BMP guidebook and the addition of webinars as a training element.
