FUELING THE FUTURE WITH SUSTAINABLE ENERGY

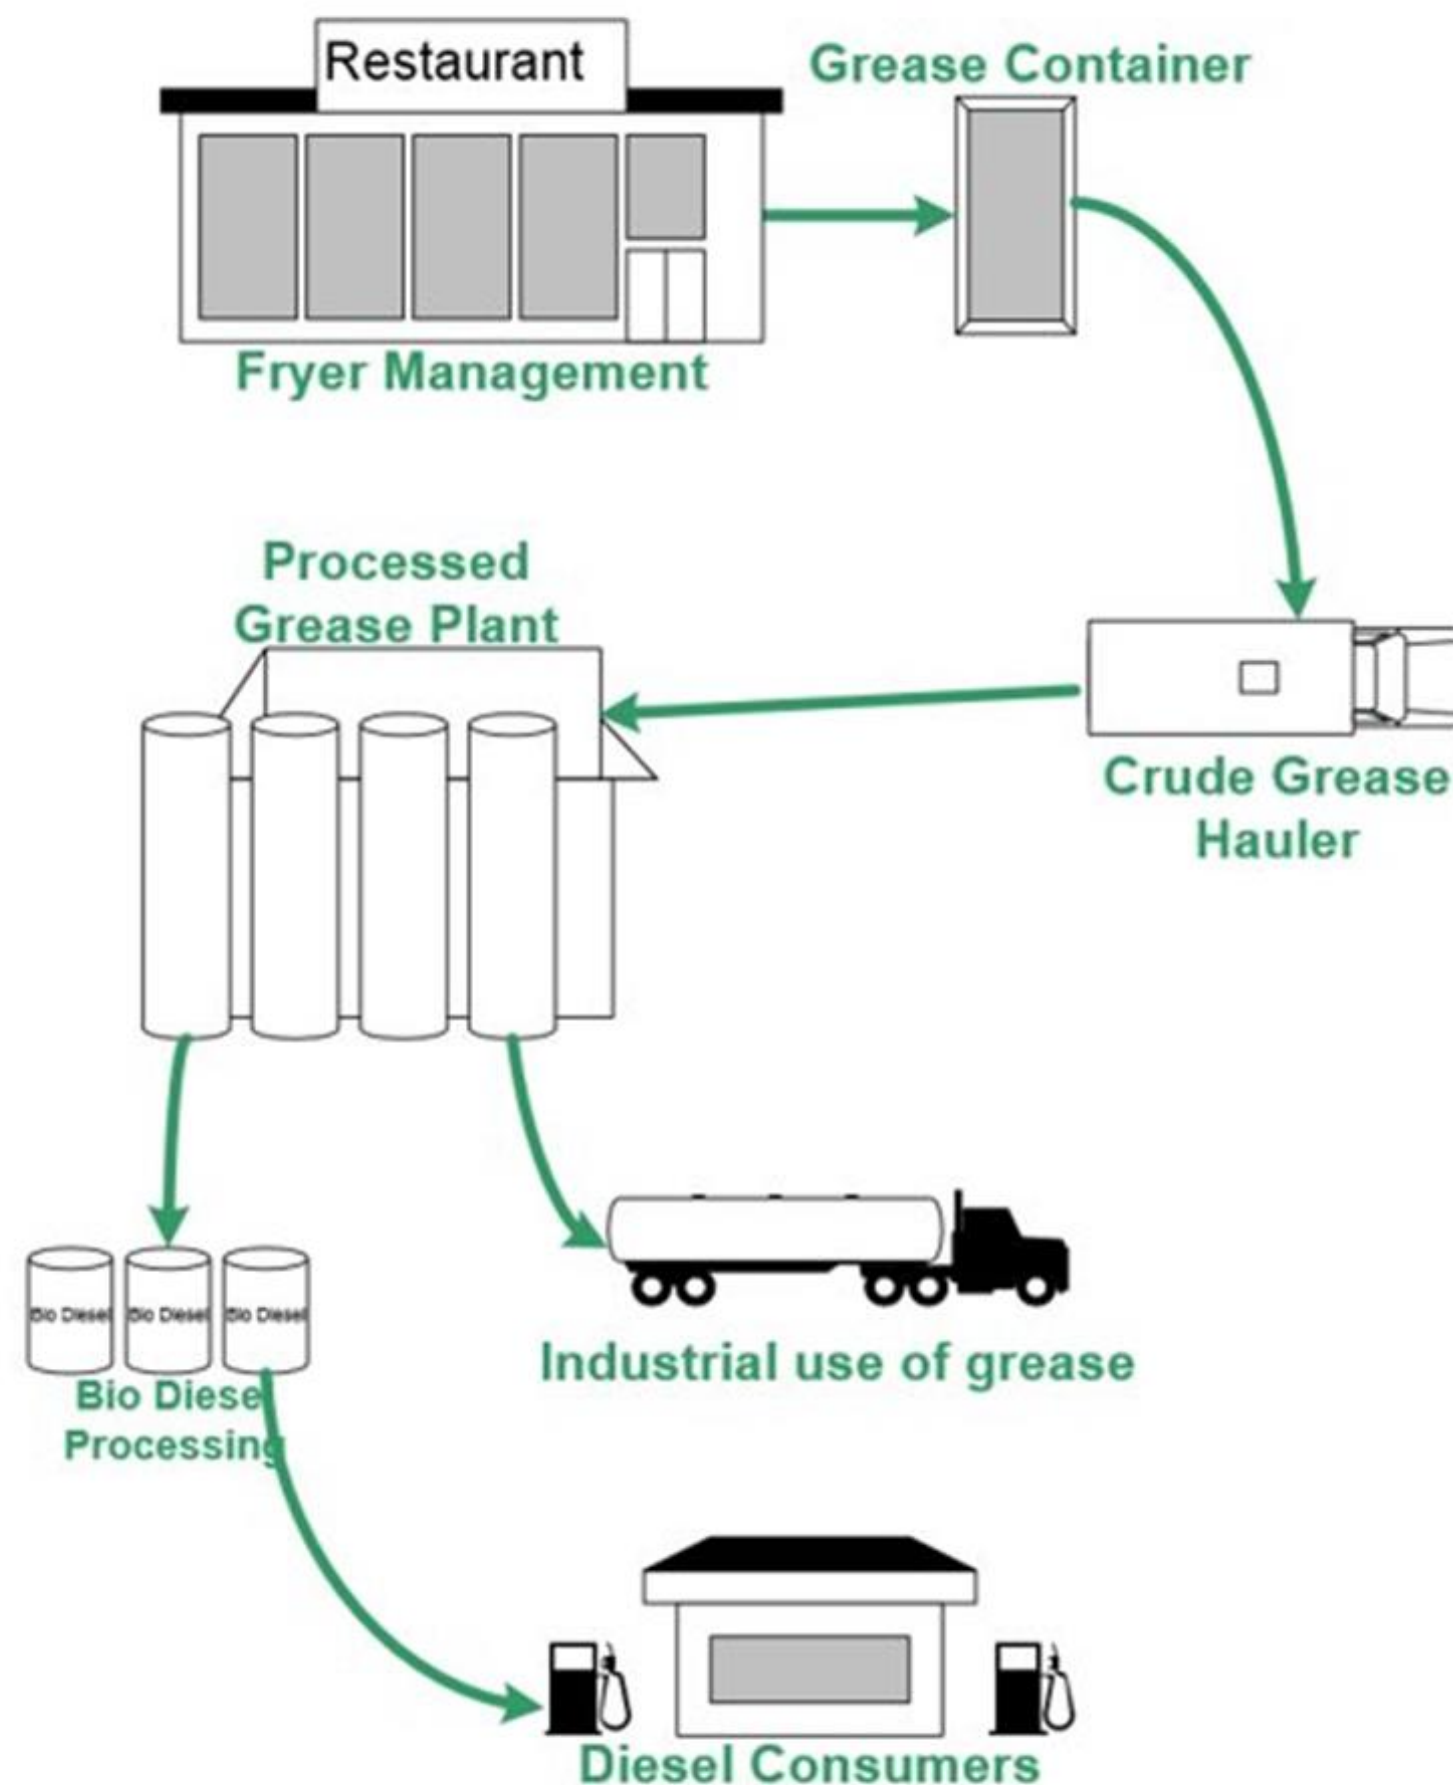

Our purpose is to repurpose

At American Bio Source, we convert your used fryer cooking oil into a valuable resource. Biodiesel is a renewable fuel derived from organic sources, such as vegetable oils.

Biodiesel offers environmental benefits by reducing greenhouse gas emissions and promoting sustainable energy solutions. It is an excellent alternative to traditional petroleum-based diesel.

BEST PRACTICES FOR GREASE RECYCLING

RESTAURANT STAFF MAKE 99.9% OF ALL
GREASE SPILLS DUE TO CARELESSNESS

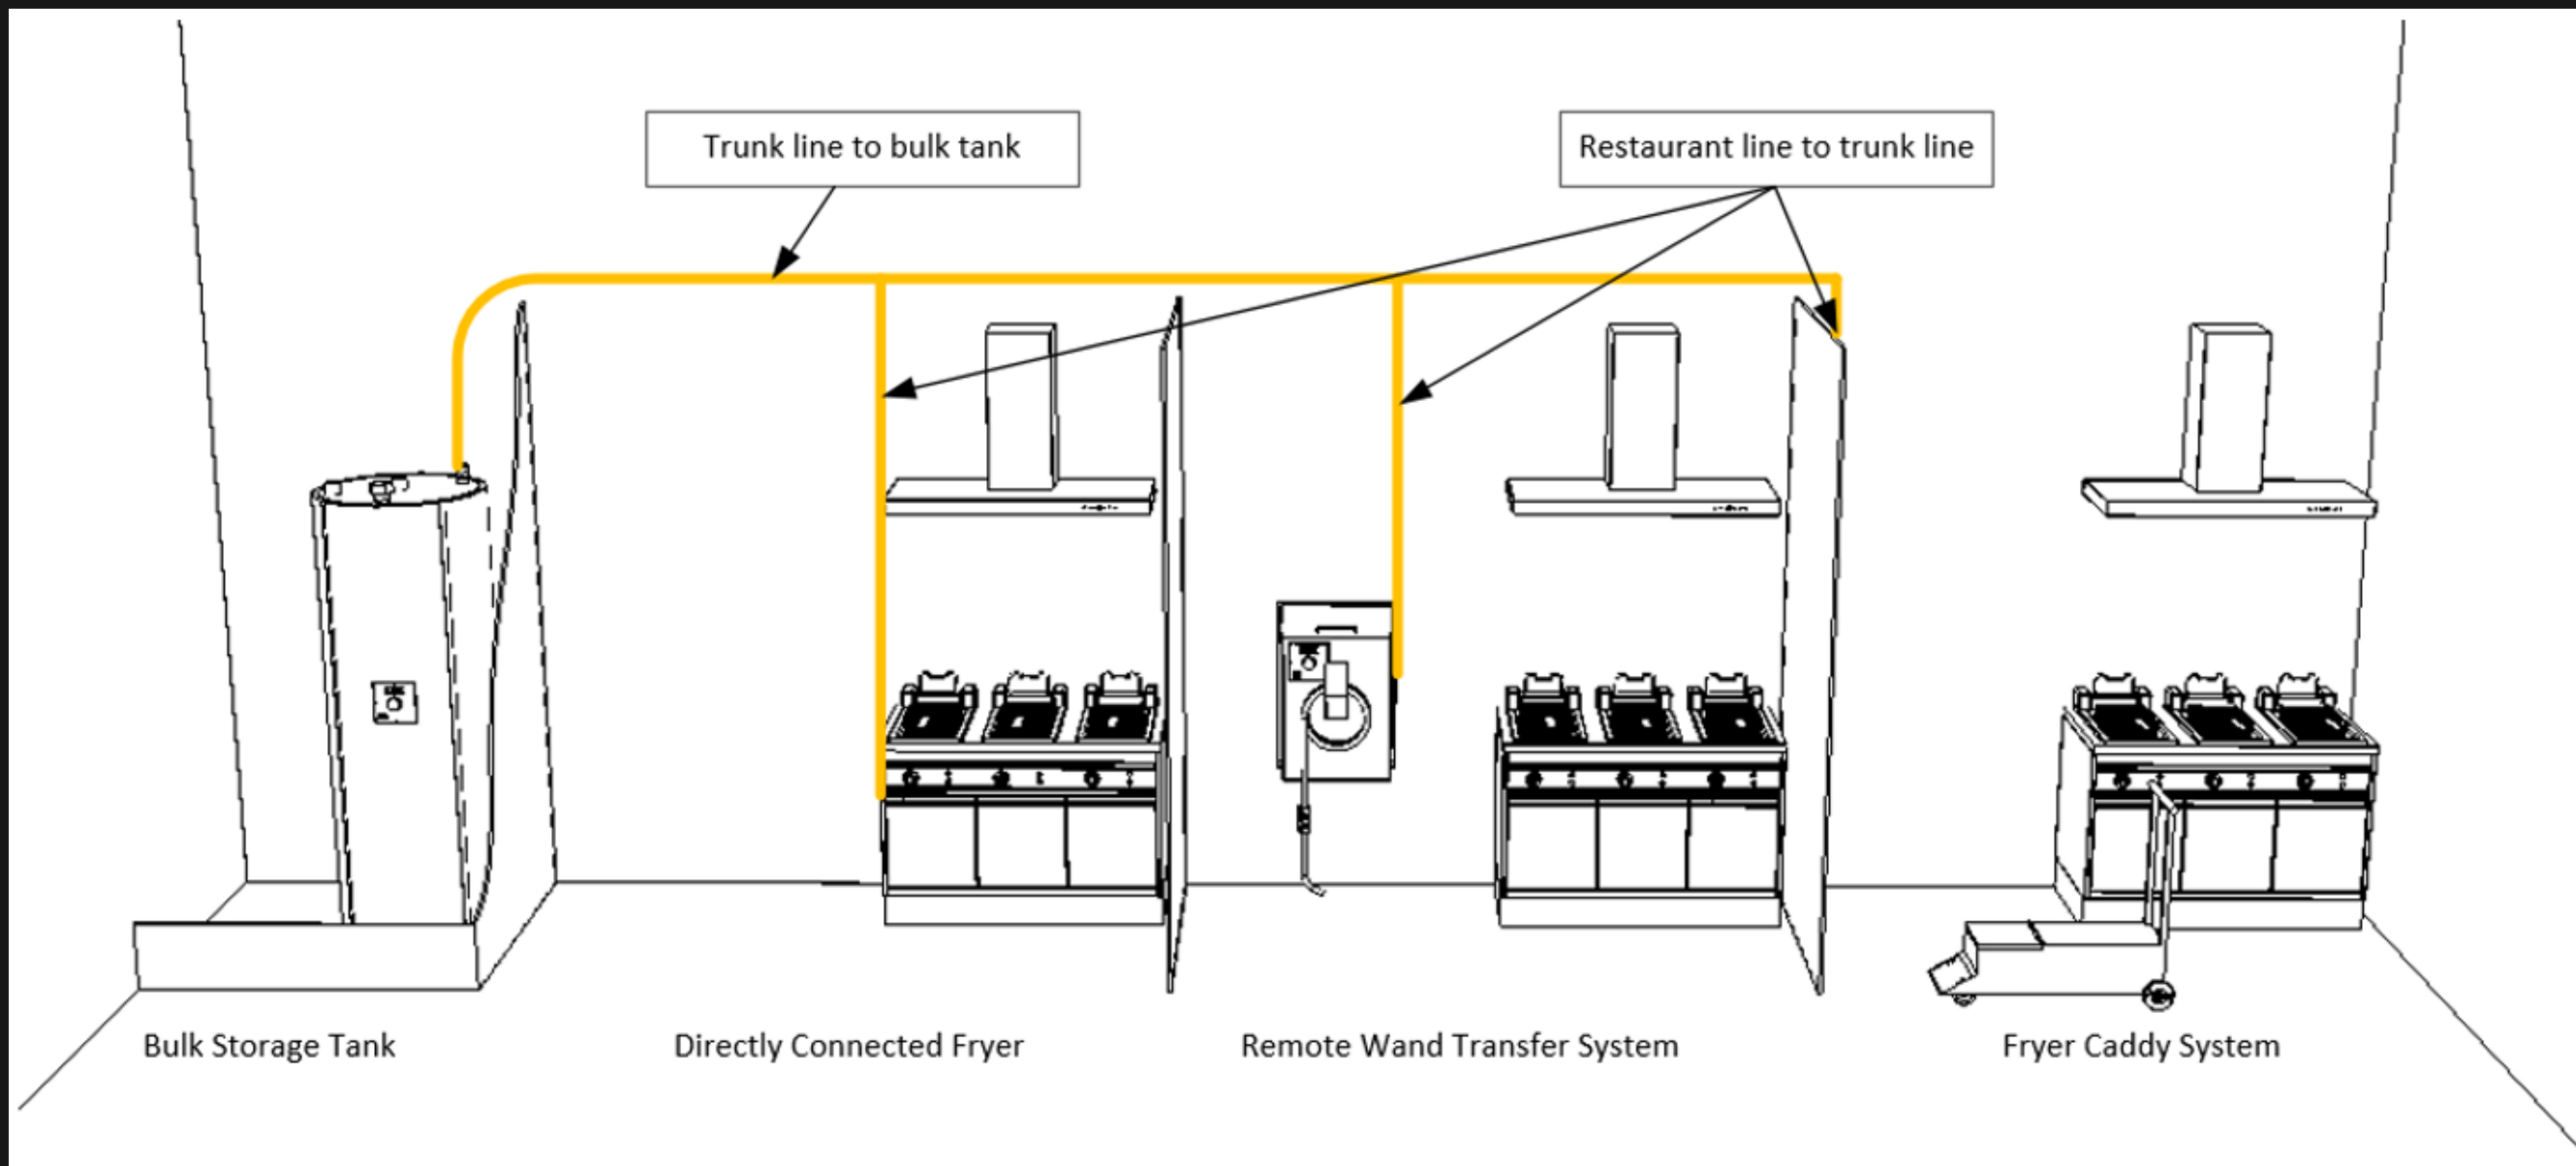

LACK OF SUPERVISION LEADS TO A MESS

Always place bins in an area where they can be monitored and checked on. Also, don't put them in a park or unmonitored parking area.
