

***Only the Three P's (Pee, Poo, and Toilet Paper) Educational Video Script***

*(From the perspective of a young child)*

*Child's goldfish dies*

*Child: "Oh no! My goldfish! It's passed!"*

*Child goes to flush said goldfish before our "Expert" pops out to stop the child.*

*Expert: "Whoooooaa there, let's not flush Pebble the Goldfish down the drain! Goldfish aren't meant to be flushed down the toilet!"*

*Child: "But why not? We do it all the time. With Noodle, Rainbow, ( give me more goldfish names please), they all seemed to flush. Well except Rocko, he was too fat to flush"*

*Expert: "Oh dear... You know, the only things you should flush are the 3 P's: pee, poo, and toilet paper."*

*Child: "What about these flushable wipes? Even the package says you can flush them."*

*Expert: "Nope! Other items, such as paper towels or wipes, even if they're advertised as "flushable," can clog your pipes and block the flow of at wastewater treatment plants.*

*Child: "Gosh, that sounds bad. What happens when pipes are clogged and the water doesn't flow at the wastewater treatment plants?"*

*Expert: "Well, these blockages lead to costly repairs for your family and your city! It can also cause damage to the environment, our city's pipes and our public health. Never flush anything besides the three P's: pee, poo, and toilet paper!"*

*Child: "Ooooh.. I get it now! Only the 3 P's. No Goldfish (or anything else!) Got it."*

*Expert: "Ha-ha yes. For more information, visit [Defend Your Drains North Texas.com](http://DefendYourDrainsNorthTexas.com)!"*
