

FORT WORTH DISTRICT PARTNERS

Fort Worth District Engineer Loyl Bussell

MAINTAIN *a safe system*

As part of the #EndTheStreakTX campaign, TxDOT is reminding drivers to stay alert, obey traffic laws and take personal responsibility behind the wheel.

Over 66,000 people have died on Texas roadways since Nov. 7, 2000.

This equates to over 6,500 days with a fatality and 3,533 average fatalities each year.

#EndTheStreakTX Campaign

At least one fatality has occurred every day on Texas roadways since Nov. 7, 2000. To help raise awareness of this tragic, daily statistic, TxDOT asked people to change their social media profile pictures to a black image and, using the hashtag #EndTheStreakTX, share their testimonials. As part of this campaign, TxDOT reminds drivers to stay alert, obey traffic laws and take personal responsibility behind the wheel.

Midtown Express

The last segment of Midtown Express TEXpress Lanes opened to traffic Oct. 27 on SH 183 and Loop 12. The 28-mile project reconstructed and rehabilitated deteriorating roadways and increased capacity by adding one TEXpress Lane in each direction on SH 183 from SH 121 in Tarrant County to I-35E in Dallas, as well as portions of SH 114 and Loop 12. The \$847 million project also included the rehabilitation of 44 bridges, construction of 26 new bridges, and completion of four direct-connect ramps.

SH 199 Ribbon Cutting

TxDOT and local leaders will hold a ribbon cutting in early 2019 to celebrate the completion of SH 199 from Nine Mile Bridge Road to Western Center Boulevard. The \$46 million Texas Clear Lanes project completed the remaining freeway section with mainlanes, bridges and ramps.

I-30 Public Meeting

A public meeting for I-30 from Linkcrest Drive to I-820 will be held on Dec. 5 at 6 p.m. at the Covenant Classical School in Fort Worth. This proposed approximately \$81 million, three-mile project would widen I-30 from four to six lanes, reconfigure the Spur 580 interchange, and construct continuous frontage roads.

FM 156 Public Meeting

A public meeting for FM 156 from US 81/287 to Intermodal Parkway will be held on Dec. 13 at 5:30 p.m. at the Hilton Garden Inn in Haslet. This proposed approximately \$54 million, five-mile project would reconstruct and widen the roadway from two to four lanes with a raised curb median, sidewalks and bicycle lanes.

TxDOT employees honored for accomplishments

Two members of the TxDOT Fort Worth District team were recently commended for their contributions to transportation and the state of Texas.

David Killingsworth, a Parker/Palo Pinto County maintenance crew chief, received the Extra Mile Award for helping save a man who suffered a heart attack while on Interstate 20.

After observing the driver pull onto the shoulder behind his TxDOT vehicle, Killingsworth recognized the man was in serious trouble and acted quickly to move his vehicle safely off the busy road. After calling 911, Killingsworth comforted and stayed with the man who lost consciousness just as paramedics arrived.

Later that same day on his personal time, he visited the man and his wife in the hospital and helped them get back to their vehicle. Killingsworth is a great example of the TxDOT spirit in caring about the safety of his fellow colleagues and the traveling public.

Theresa Poer, the Fort Worth District's director of transportation operations, won TxDOT's prestigious Dewitt C. Greer Award, named after the state highway engineer who oversaw the construction of more than half of today's Texas highway system.

The award recognizes the skill, innovation and performance excellence of department engineers.

As project manager, Poer launched the North Tarrant Express in 2010 in what was the largest and most complex transportation improvement project in the history of Tarrant County. The \$2.5 billion project was the first in the state to reconstruct a corridor and add TEXpress Lanes.

Poer now oversees TxDOT's TransVISION system and is currently focusing on addressing wrong way crashes. In what promises to be a revolutionary program, her team is currently testing wrong way driver countermeasures along Interstate 30 and SH 360.

L-R: Deputy Executive Director Marc Williams, 2018 Extra Mile Award winner David Killingsworth, Chief Engineer Bill Hale and Executive Director James Bass

L-R: TxDOT Transportation Chairman J. Bruce Bugg, Jr., TTI Director Greg Winfree, 2018 Dewitt C. Greer Award winner Theresa Poer and Bass

TxDOT WORKING TO END DEADLY TREND

November 2018 Marked Grim Milestone of More Than 66,000 Roadway Deaths Since 2000

DALLAS — With last month marking the 18th anniversary of the last fatality-free day on Texas highways, TxDOT is using a new, statewide safety campaign in hopes of ending this deadly streak.

Since Nov. 7, 2000, at least one person has died on Texas roadways every single day. TxDOT is using its **#EndTheStreakTX** campaign to raise awareness of this tragic, daily statistic.

"We all have the power to end the streak of daily deaths on Texas roadways," said Texas Transportation Commissioner Laura Ryan. "Don't drink and drive; put away the cell phone; buckle up; and obey traffic laws. Be the driver you would want next to you, in front of you or behind you. Together, we can end the streak."

TxDOT is asking people to share personal stories of loved ones lost in car crashes on their social media pages using photo and video testimonials with the hashtag, **#EndTheStreakTX**. The agency also will be posting startling statistics for the public to repost on social media outlets to help share this important message.

The campaign aims to remind drivers it's a shared responsibility among roadway users and engineers to keep our roads safe.

HOW DO THE CHEMICALS WORK?

Granular De-Icer

A granular de-icer – salt for instance – lowers the freezing point of water from 32 °F to about 15 °F (depending on how much you use).

When salt makes contact with ice – melting begins immediately and spreads out from that point, creating a salt/water mix (brine) that continues melting the ice, undercutting the bond between the ice and the road.

Melting Ice Takes Time

The temperature and the amount of ice or snow on the road determine de-icing material amounts and melting rates. As temperatures drop, the amount of de-icer needed to melt a given quantity of ice increases significantly.

WHAT MATERIALS ARE USED ON THE ROADS?

Before an ice/Snow Event

- Liquid salt-based anti-icers help prevent ice formation

During an ice/Snow Event

- Various salt-based granular de-icers are used to help melt ice already formed on the road

AFTER SNOW/ICE EVENT

- Stockpiles/supplies are replenished (multi-day storm)
- Roadways are swept/cleaned of excess aggregate
- Winter plan effectiveness is evaluated and adjusted
- Roadway repairs are scheduled (Potholes, guardrails, structures, etc.)
- Equipment is serviced & prepared for the next winter storm

THE TxDOT SAFETY CAMPAIGNS EFFORT

CONTINUED from Cover Story

“It’s heartbreaking to know that every day for the past 18 years someone has lost a spouse, child, friend or neighbor on our state’s roadways,” said TxDOT Executive Director James Bass. “Ending this deadly daily streak is a shared responsibility. We will continue to engineer our roads to be more forgiving of drivers’ errors, but we all must work toward ending such preventable contributing factors as distracted driving, speeding and drunk driving. Let’s make it a priority to be safe, focused and responsible behind the wheel. Let’s end the streak.”

Since Nov. 7, 2000, fatalities resulting from vehicle crashes on Texas roadways have numbered more than 66,000. The leading causes of fatalities continue to be failure to stay in one lane, alcohol and speed.

In addition to **#EndTheStreakTX**, TxDOT launched its **“Plan While You Can”** cam-
