Improvement Program/Statewide Transportation

Improvement Program and other

administrative/planning documents as needed. It is estimated this exchange will not exceed \$450,000 .

Performance Measure(s) Addressed: Air Quality, Congestion

2.2. Endorsement of Regional Transportation Council Action on Klyde Warren Park Extension Cost Increase

Presenter: Christie Gotti, NCTCOG

Item Summary: At its October 14, 2021, meeting, the Regional

Transportation Council (RTC) approved funding the

federal share of an \$8.5 million cost overrun (\$6.8 million federal and \$1.7 million local) for the previously funded Klyde Warren Park Expansion project. The Committee is asked to endorse this action. The City of Dallas will cover the local match for the cost increase. This action includes approval for North

Central Texas Council of Governments staff to administratively amend the Transportation

Improvement Program and other

planning/administrative documents to incorporate

these changes.

Background: In December 2016, the RTC approved funding for the

Klyde Warren Park Expansion. A total of \$30 million in federal funds, along with the corresponding \$7.5 million local match were approved, of which \$10 million of the federal funding is to be repaid by the City of Dallas, along with the City's private-sector partners. The project has an additional \$60 million in non-transportation-related investments that will fund park amenities. Final design plans have indicated a \$8.5 million cost overrun on the transportation components, which increases the cost from \$37.5 million to \$46 million. The City and Texas Department of Transportation have asked the RTC to cover the federal share with the City providing the local match for the increase. Electronic Item 2.2 provides a

summary of existing and proposed funding.

Performance Measure(s) Addressed: Air Quality, Bike/Ped+

1:40 – 1:50 3. Blue-Green-Grey Application for New Ideas Round 3 – Project Funding Recommendations

☐ Action ☐ Possible Action ☐ Information Minutes: 10

Presenter: Shawn Conrad, NCTCOG

Item Summary: Staff will provide information regarding the Blue-Green-Grey

Application for New Ideas Round 3 funding opportunity,

proposals received, and evaluation process. A

recommendation for Regional Transportation Council (RTC)

approval to award funding for implementation of selected

projects will be requested.

Background: The North Central Texas Council of Governments (NCTCOG)

issued the Round 3 Blue-Green-Grey funding opportunity on July 19, 2021. Applications were due on August 13, 2021. Eligible projects are within the 12-county Metropolitan Planning Area and incorporate three elements – Blue (water), Green (environment), and Grey (transportation infrastructure). The goal of the Blue-Green-Grey program is to support innovative pilot projects that provide resources for cities and organizations to replicate these ideas throughout the metroplex. Eligible applicants include teams of individuals, private firms, educational facilities, and governmental agencies. The maximum award is \$75,000. A project evaluation committee reviewed the nine applications received

Staff will seek a recommendation for RTC approval to proceed with awards for implementation of projects awarded through the 2021 Blue-Green-Grey Application for New Ideas Round 3. <u>Electronic Item 3.1</u> provides additional information on application scoring. <u>Electronic Item 3.2</u> reflects NCTCOG staff award recommendations.

and has selected three projects for funding recommendation.

Performance Measure(s) Addressed: Administrative

1:50 – 2:00 4. 2023-2026 Management, Operations and Safety Program

☐ Action ☐ Possible Action ☐ Information Minutes: 10

Presenter: Brian Dell, NCTCOG

Item Summary: Approximately every four years, staff aggregates

transportation items related to management and operations. This item will present the process to identify those projects for 2023-2026 and reasons for the inclusion of a safety program.

Background: The Transportation Department is frequently asked to conduct

a series of transportation initiatives that include management and operations. The initiatives are best aggregated into an overall program conducted over several years. The existing program is being completed in 2022 and a continuation of existing and new initiatives need to be in place to begin October 1, 2023. In addition, increased focused on

transportation safety for all modes is proposed as part of a statewide partnership with the Texas Department of

Transportation. It is anticipated that the 2023-2026 program will be for management, operations, and safety. Typically, 50 percent or more of these funds are passed through to

cities, counties, and transportation agencies for

implementation. Electronic Item 4 contains additional details

on the funding program.

Performance Measure(s) Addressed: Air Quality, Congestion, Safety

2:00 – 2:10	5.	North Central 1 Status Report	Texas Council of Governments Demographic Forecast
		☐ Action Presenter:	☐ Possible Action ☑ Information Minutes: 10 Dan Kessler, NCTCOG
		Item Summary:	Staff will provide an update on ongoing efforts to develop revised 2045 Population and Employment for the Metropolitan Area.
		Background:	The North Central Texas Council of Governments is currently developing new forecasts of demographic activity out to the year 2045, which will be used to support the ongoing update of Mobility 2045: the Metropolitan Transportation Plan for North Central Texas. An update on the status of demographic forecast estimates will be provided.
		Performance Mo	easure(s) Addressed: Roadway, Transit
2:10 – 2:20	6.	Metropolitan To ☐ Action Presenter: Item Summary:	ransportation Plan Update ☐ Possible Action ☑ Information Minutes: 10 Amy Johnson, NCTCOG Mobility 2045 was adopted by the Regional Transportation
		item ourimary.	Council (RTC) on June 14, 2018. Staff will provide a report regarding efforts to update Mobility 2045, highlighting notable policy/program updates.
		Background:	Following RTC adoption of Mobility 2045, staff and partner agencies have been working toward implementing the mobility plan. These efforts include planning and project development tasks, projects in construction, and coordination with the public and our transportation partners.
			Federal guidelines require the Dallas-Fort Worth region to update the long-range transportation plan a minimum of every four years. In addition, the Mobility 2045 Update must demonstrate transportation conformity. The updated plan will include a new financial plan and necessary refinements to projects in the current Mobility 2045 plan.
		Performance Mo	easure(s) Addressed: Roadway, Transit
2:20 – 2:30	7.	☐ Action Presenter:	P.1/Fiscal Year 2022 Project Tracking Initiative ☐ Possible Action ☑ Information Minutes: 10 Brian Dell, NCTCOG Staff will provide the Committee with a final report on the Fiscal Year (FY) 2021 Project Tracking Initiative and introduce the FY2022 project list. This effort is being conducted in order
		Background:	to maintain appropriate federal obligation of funds and expedite project delivery. Almost every year, Regional Transportation Council (RTC)-selected projects being implemented by local governments experience delays. While a one-year delay is of less consequence, projects tend to be delayed year after year. Over time, these delays led to the need to implement the

Metropolitan Planning Organization Milestone Policy, which identifies projects that have not advanced to construction after being funded for at least ten years. However, a ten-year project review does not create an action plan soon enough to maintain the region's Congestion Mitigation and Air Quality Improvement Program, Surface Transportation Block Grant Program, and Transportation Alternatives Set Aside obligation balances. As a secondary line of offense, staff has implemented a project tracking initiative that will highlight project schedule commitments to the Surface Transportation Technical Committee and the RTC on a regular basis and report local agency progress toward the committed project development schedules. A list of projects that were scheduled to begin in FY2021 and their current status can be found in Electronic Item 7.1. A list of projects that are scheduled to begin in FY2022 and their current status can be found in Electronic Item 7.2. Additional details on both initiatives can be found in Electronic Item 7.3.

Performance Measure(s) Addressed: Roadway, Air Quality

2:30 – 2:40 8. Status Report on Local Government Energy Reporting

□ Action □ Possible Action ☑ Information Minutes: 10

Presenter: Dorothy Gilliam, NCTCOG

Item Summary: Staff will provide an overview of the state-mandated local

government energy reporting requirements and the North Central Texas Council of Governments' (NCTCOG's) efforts to

increase the rate of local government energy reports

submitted to the State Energy Conservation Office (SECO). A summary of energy management resources will also be

presented.

Background: Texas' demand for power continues to grow as a result of

increased population and employment creating potential increase in emissions and impact to air quality. To mitigate emissions impacts and demand on the grid, Texas passed legislation in 2001 mandating local governments in and near nonattainment areas set a goal to reduce their electricity consumption by 5 percent every year. This requirement is detailed in the Texas Health and Safety Code §388.005(c)

available at https://statutes.capitol.texas.gov/

Docs/HS/htm/HS.388.htm#388.005. Legislation passed in the 2019 session updated this requirement, resetting the baseline at September 1, 2019, and extending the requirements to 2026. To increase awareness of this reporting requirement, NCTCOG staff has developed resources, offered informational webinars, and provided technical assistance to increase compliance to required reporting. Additional details are available in Electronic Item 8.

Performance Measure(s) Addressed: Air Quality

2:40 - 2:409. Fast Facts ☐ Action □ Possible Action ✓ Information Minutes: 0 Item Summary: Staff presentations will not be made. Please reference the material provided for each of the following topics. 1. Air Quality Funding Opportunities for Vehicles (https://www.nctcog.org/trans/quality/air/funding-and-resources) 2. Dallas-Fort Worth Clean Cities Events (https://www.dfwcleancities.org/events) 3. Status Report on Texas Volkswagen Environmental Mitigation Program Funding (Electronic Item 9.1) 4. Status Report on Ozone Season (Electronic Item 9.2) 5. Know Before You Fly Your Drone Workshops (www.northtexasuas.com/UAS-Taskforce#Workshops) 6. Deadline to Submit Requests for Transportation Improvement Program Modifications through the February 2022 Cycle - October 22, 2021 (https://rtrinternal.nctcog.org/login) 7. Auto Occupancy/High-Occupancy Vehicle Quarterly Subsidy Report (Electronic Item 9.3) 8. 2021 Texas Department of Transportation Highway Safety Improvement Program Call for Projects Submittal Deadline for Applications Due to District Offices November 17, 2021 (https://www.txdot.gov/insidetxdot/forms-publications/publications/highway-safety.html) 9. 2021 Fall Traffic Incident Management Executive Level Course Announcement (Electronic Item 9.4) 10. Immediate Action Freeway Projects-State Contingency (Electronic Item 9.5) 11. Economic Development Administration Grant Opportunities: Four Projects (Electronic Item 9.6)

- 12. September Online Input Opportunity Minutes (Electronic Item 9.7)
- 13. Public Comments Report (Electronic Item 9.8)
- 14. Written Progress Reports:
 - Local Motion (Electronic Item 9.9)
 - Partner Progress Reports (Electronic Item 9.10)
- 10. Other Business (Old or New): This item provides an opportunity for members to bring items of interest before the group.
- 11. **Next Meeting:** The next meeting of the Surface Transportation Technical Committee is scheduled for *1:30 pm on December 3, 2021.*

MINUTES

SURFACE TRANSPORTATION TECHNICAL COMMITTEE September 24, 2021

The Surface Transportation Technical Committee (STTC) held a meeting on Friday, September 24, 2021, at 1:30 pm by videoconference. The Regional Transportation Council Bylaws establish that the Technical Committee approved membership in attendance at a meeting shall constitute a quorum for action to be taken, therefore individual attendance was not taken for committee members or other attendees.

- 1. <u>Approval of August 27, 2021, Minutes:</u> The minutes of the August 27, 2021, meeting were approved as submitted in Electronic Item 1. Bryan Beck (M); Melissa Baker (S). The motion passed unanimously.
- 2. **Consent Agenda:** The following items were included on the Consent Agenda.
 - 2.1 <u>Transportation Improvement Program Modifications:</u> A recommendation for Regional Transportation Council (RTC) approval of revisions to the 2021-2024 Transportation Improvement Program (TIP) was requested, along with the ability to amend the Unified Planning Work and other panning documents with TIP-related changes. Revisions were provided in Electron Item 2.1.
 - 2.2. Endorsement of the Regional Transportation Council's Ratification of Emergency Funding Authorization to Dallas Area Rapid Transit for Interim Funding for the Regional Vanpool Program: Endorsement of the Regional Transportation Council's ratification of emergency funding authorization to Dallas Area Rapid Transit (DART) for interim funding for the Regional Vanpool Program was requested. Approval included utilization of Regional Transportation Council Local funds in an amount not to exceed \$45,000 to ensure continuation of vanpool services for DART participants until new agreements are fully executed and funding is in place.

A motion was made to approve the items on the Consent Agenda. Jim O'Connor (M); Bryan Beck (S). The motion passed unanimously.

3. 2022 Unified Transportation Program and Regional 10-Year Plan Update: Brian Dell provided an update on the projects funded by the Texas Transportation Commission (TTC) in the 2022 Unified Transportation Program (UTP). Earlier in the year, the Committee and the Regional Transportation Council (RTC) approved updates to the Regional 10-Year Plan. Changes included projects funded with Category 2 and Category 4 funds and requests to the TTC for Category 12 funds. At its August 2021 meeting, the TTC approved the 2022 UTP which included all Category 2 and Category 4 projects in the region and Category 12 funds totaling approximately \$255 million in the eastern subregion and approximately \$84 million in the western subregion. A series of project changes made since last presented to the Committee and RTC were highlighted. Staff proposed to increase Category 2 funding for two projects in Hunt County since requested Category 12 funding was not awarded. In addition, a project proposed for Category 12 funding in Collin County was partially funded with Category 4 funds by the Texas Department of Transportation (TxDOT) Dallas District instead. Three projects were awarded Category 12 funding in the western subregion: a portion of IH 20 in Parker County, a section of IH 30 in Tarrant County, as well as funding for three years of implementation for the Regional Mobility Assistance Patrol project in the

Fort Worth District. Several projects were awarded Category 12 funding in the eastern subregion, US 380 in Collin County was awarded approximately \$40 million, the IH 30 Canyon project in Dallas County was awarded an additional \$101 million, and US 80 in Dallas County was awarded approximately \$103 million. In addition, a series of overpasses and interchanges along IH 30 in Hunt County were awarded \$4.4 million in additional funding. The Dallas District Regional Mobility Assistance Patrol also received approximately \$6 million to covers three years of implementation. He noted historical allocations for Category 12 funds have been updated due to receipt of the FY2022 authorizations, totaling approximately \$2.6 billion in the 2022 UTP. Mr. Dell also provided an update on the Surface Transportation Block Grant Program (STBG)/Category 2 funding exchange approved by the RTC in July 2021. Category 2 funding was removed from US 287 and SL 9 and replaced with STBG funds to help reduce the region's balance of STBG funds and staff committed to bring back a proposal for the specific projects to be funded with the freed-up Category 2 funds. He noted the amount being exchanged was reduced from the originally proposed amount of \$141 million due to cost savings on the SL 9 project of approximately \$41 million. An overview of the projects proposed for the funding exchange was provided. Projects proposed to receive funding from the SL 9 funding exchange include FM 429 from North of US 80 to 1 mile S of US 80, SH 114 from West of US 377 to East of IH 35W, and a section of IH 35E to be determined. IH 820 at the Trinity Railway Express (TRE) Line from North of Trinity Blvd to South of SH 10, IH 20 from FM 1187 to US 180, and SH 360 frontage roads from the Trinity River to Post and Paddock were proposed for the US 287 funding exchange. Maps showing approved and proposed projects in the Regional 10-Year Plan and their current status were highlighted and included updates to remove the Category 12 projects that were not selected for funding. In addition, a map including recently completed and active capacity transportation projects, including all funding sources that are not part of the 10-Year Plan was also highlighted. Mr. Dell noted NCTCOG staff will continue to coordinate with TxDOT on the next round of the 10-Year Plan changes, including efforts to re-fund projects that had funding removed in previous plans if funding targets permit. In addition, staff will develop a revised scoring process to prioritize and score 10-Year Plan projects. The revised process will be brought back for review and approval at a future meeting. The anticipated schedule for the 2023 UTP was highlighted. TxDOT will be working to determine how much funding will be allocated across the state over the next few months. Staff expects that an initial draft project listing will be due to TxDOT in January 2022, followed by receipt of anticipated funding targets. Once targets are received, staff will work to adjust project listings to the anticipated revenues before providing to the public, Committee, and RTC for review. TTC approval of the 2023 UTP is expected in August 2022. Details of the projects approved for funding in the UTP, project recommendations to complete the Category 2/STBG funding exchange were provided in Electronic Item 3.1 and the revised 10-Year Plan project listings were provided in Electronic Item 3.2. Electronic Item 3.3 contained the 10-Year Plan projects that have let or been completed. Electronic Item 3.4 contained the projects being proposed for the Category 2/STBG funding exchange. Action requested of the Committee was reviewed. Michael Morris noted that the Texas Transportation Commission kept the IH 45 project in Houston in the UTP and has indicated the TTC will be calling a special meeting in December 2021 to address the project. He noted this special meeting should be added to the calendar because if the Federal Highway Administration does not change its position about IH 45, funding currently on the project would have to be reprogrammed. Staff will work with TxDOT districts to have projects ready for implementation should additional funding become available to the region. Clarence Daugherty asked if there have been any conversations with TxDOT on how to fund US 380 in the future. Mr. Morris noted that staff continue to recommend additional transportation money in Category 12 for US 380, as well as continue to advocate for the region's fair share of Category 2 funds which would also help to fund US 380. If IH 45 funding must be

reallocated, it is possible that the region would receive additional Category 12 funding. In addition, he noted that TxDOT Dallas is supportive of US 380 moving ahead so it will be important for the project to be cleared and staged. Mr. Daugherty also noted the US 75 was shown on one of the maps as a tolled project and asked if some final decision about the project had been determined. Mr. Morris noted that staff continue efforts to advance a technology lane on US 75 until a permanent solution can be implemented. John Polster discussed SH 114 main lanes which were not awarded Category 12 funding. He noted the projects would be ready to let in April 2022 and asked if staff had any suggestions for funding the project. Mr. Morris noted that staff would pursue funding as suggested for US 380. A motion was made to recommend Regional Transportation Council approval of the final 2021 Regional 10-Year Plan project listing, the proposed projects to complete the Category 2/STBG funding exchange, and administratively amending the Transportation Improvement Program/Statewide Transportation Improvement Program and other planning/administrative documents to incorporate the changes. Clarence Daugherty (M); Shawn Poe (S). The motion passed unanimously.

4. Trinity Railway Express Shuttle Funding for Continued Operations: Gypsy Gavia presented a recommendation to utilize previously approved funding for transit projects to support the continued operations of the Trinity Metro shuttle service between Dallas Fort Worth International Airport (DFW Airport) and the Trinity Railway Express (TRE) Centreport Station. The TRE shuttle has traditionally operated from the TRE Centreport Station to the Remote South parking lot at the DFW Airport. From there passengers transferred to their terminals using airport shuttles. Due to reduced traffic at the airport related to COVID-19 and closure of the Remote South parking lot, the route was shifted to the Rental Car Center. Users are now returning to the airport so operating partners are working to relocate the shuttle stop and route options. There are significant costs to rerouting the shuttle and increasing frequency, so partners have proposed to continue service operations with a headway of 40 minutes during off peak hours and 20 minutes during peak hours. Ms. Gavia noted that in 2009, the airport was first awarded transit funds to implement the TRE shuttle service from the Centreport Station to the remote south parking lot. The project was again awarded in 2012 and 2015 through the Transit Call for Projects. In 2018, the airport notified North Central Texas Council of Governments (NCTCOG) staff of its intention to discontinue the shuttle service the following year once the TEXRail service was fully operational. Staff and partners worked together to identify alternate options to ensure the continuation of service. Trinity Metro began operating the service as the TRE Link (Route 31) in 2019 and the airport's funding that was previously awarded through Federal Transit Administration funds was transferred to Trinity Metro. Over the past few months, Trinity Metro, Dallas Area Rapid Transit (DART), and the DFW Airport have reached out to staff requesting operational support as more time is needed to finalize a system sustainability plan for the service due to agency budget constraints and challenges experienced from reduced ridership during the COVID-19 pandemic. Staff has identified approximately \$910,000 in previously approved Regional Toll Revenue (RTR) funds for transit projects and Surface Transportation Block Grant Program funds from the COVID-19 Infrastructure Program #015: Transit Partnership funds that can be utilized for the project. Proposed funds would provide 50 percent of the funding to be matched by funds split among Trinity Metro, DART, and DFW Airport. The first year of proposed funding would be available through existing RTR funds for a total of \$290,000 and the following two years would be funded with STBG funds in an amount not to exceed \$620,000. Funding would help ensure that operations continue as partners finalize a sustainability plan for the shuttle service without additional operating funds from the RTC. Ms. Gavia noted that agencies would be meeting in the next year to ensure Trinity Metro, DART, and the DFW Airport can fully assume responsibility of funding for the shuttle service after FY2024. Details were provided

in Electronic Item 4. Greg Royster discussed current operation of the shuttle service which includes bus-to-bus transfer at the Rental Car Center. He noted the shuttle service includes the transfer of airport employees as well as employees to airport hotels and that as passenger demand increases, it will be important for the agencies to consider a more seamless route directly from the TRE Stations to the terminals. He added the airport was interested in considering options in the central terminal area to ensure that its transitdependent employees are served. NCTCOG staff noted it would be happy to work with the DFW Airport on its future vision for the shuttle service. A motion was made to recommend Regional Transportation Council approval to utilize existing Regional Toll Revenue funds previously approved for transit and previously approved COVID-19 Infrastructure Program #15: Transit Partnership Surface Transportation Block Grant funds for a total not to exceed of \$910,000, for Trinity Metro, DART, and DFW Airport to assume funding responsibility after FY2024 for shuttle service between the TRE Centreport Station and DFW Airport. Action also included a recommendation to approve revising administrative documents as appropriate to incorporate the project. Phil Dupler (M); Robert Woodbury III (S). The motion passed unanimously.

- 5. Call for Projects to Reduce Diesel Emissions: Huong Duong presented details of a new, competitive call for projects (CFP) to award rebates through the North Texas Clean Diesel Projects 20201 funding initiative. The North Central Texas Council of Governments (NCTCOG) pursues funding that can be used in the region to improve air quality and develop calls for projects that help reduce emissions within the region. Approximately one third of nitrogen oxide emissions in the Dallas-Fort Worth region is attributed to on-road vehicles, of which 48 percent comes from heavy-duty vehicles primarily when idling. Ms. Duong highlighted the status of the FY2020 Clean Fleet North Texas funding and provided details for the FY2021 Clean Fleet North Texas Call for Projects. Approximately \$1.5 million is available from the Environmental Protection Agency (EPA) National Clean Diesel Funding Assistance Program for private fleets and companies, as well as local governments. Eligible projects include the replacement of on-road and non-road diesel engines, vehicles, and equipment, installation of locomotive shore power, replacement of diesel transportation refrigeration units (TRU) trailers, and replacement of diesel drayage vehicles. Funding thresholds vary regarding replacement type and were detailed in Electronic Item 5. Funding will be available through a competitive rebate program for projects in the 10-county ozone nonattainment area and adoption of the Clean Fleet Policy is required. Scoring criteria was highlighted and will be based on cost per ton of nitrogen oxides reduced and recipient oversight, as well as consideration of project operation in Environmental Justice areas. This will help ensure selected projects provide the most emission benefits with the least risk and most impact on high poverty and minority areas. Staff proposed that the Call for Projects open on October 14, 2021, with a 90-day rolling application deadline until all funds are awarded. A motion was made to recommend Regional Transportation Council approval of the North Texas Clean Diesel Project 2021 Call for Projects, including the call for project details, eligibility screens, selection criteria and schedule detailed in Electronic Item 5. Bryan Beck (M); Mark Nelson (S). The motion passed unanimously.
- 6. Locally Enforced Motor Vehicle Idling Restrictions Resolution:

 Jason Brown presented a recommendation to approve a revised Resolution Supporting Locally Enforced Motor Vehicle Idling Restricts in North Central Texas. This initiative focuses on eliminating unnecessary idling and the reduction of diesel emissions and high emitting vehicles and also aligns with air quality policies within the mobility plan. Details of the Texas Commission on Environmental Quality (TCEQ) Locally Enforced Motor Vehicle Idling Limitations rule was provided. The rule, included in Electronic Item 6.2, is regulated through the Texas

Administrative Code Rule 114 and impacts motorists operating medium to heavy duty vehicles that are greater than 14,000 pounds within local government jurisdictions having a Memorandum of Agreement (MOA) with TCEQ. It stipulates requirements to control vehicles engine idling to no more than five consecutive minutes while not in motion with certain exemptions. In 2008, the Regional Transportation Council (RTC) approved a resolution encouraging entities to adopt the TCEQ vehicle idling restriction rule, provided in Electronic Item 6.1. Since that time, cities in the region have signed the TCEQ MOA which allowed enforcement of the idling restriction and many also adopted their own ordinances or resolutions. In addition, the North Texas Council of Governments collaborated with the TCEQ and local governments to develop the Engine Office North Texas Local Government Guide. During that time, partners identified the need to revise the resolution in order to align the language with those restrictions in place within local governments. Mr. Brown reviewed proposed updates to the resolution, which was provided in Electronic Item 6.3. The revised resolution will identify locally enforced motor vehicle idling restrictions as Weight-of-Evidence within the State Implementation Plan, endorse implementation of an idling restriction ordinance/resolution (not specifically tied to the TCEQ MOA), and encourages local governments to adopt any idling restrictions as applicable to local government needs. The language in the revised resolution will allow cities and counties to have more flexibility in implementing an idling restriction or ordinance while still being eligible for funding from TCEQ for idle reduction infrastructure. In addition, the revised resolution will allow for program efforts to be documented as Weight-of-Evidence within the SIP. Additional information was provided in Electronic Item 6.4. A motion was made to recommend Regional Transportation Council (RTC) approval of a revised Regional Transportation Council Resolution Supporting Locally Enforced Motor Vehicle Idling Restrictions in North Central Texas, provided in Electronic Item 6.3. Clarence Daugherty (M); Kevin Overton (S). The motion passed unanimously.

7. Director of Transportation Report on Selected Items: Michael Morris presented items on the Director of Transportation report. He highlighted information about the Statewide Safety Program. The Texas Department of Transportation would like to provide assistance to lower the fatality rate in Texas and have proposed to bring together metropolitan planning organizations across the state along with area districts to form a statewide safety task force. Members will be provided updates in the future of related safety efforts. In addition, he highlighted the Dallas Area Rapid Transit D2 project and noted that at the September 9, 2021, Regional Transportation Council (RTC) meeting he discussed an opportunity for policy officials in the region to consider the feasibility and timing of the D2 rail line project. He noted the D2 rail line was originally proposed to address green times on north/south thoroughfare streets in downtown Dallas crossing the existing light rail line as a result of anticipated future train frequencies and increased train lengths. He highlighted the D2 project in Zone B of the map and discussed ongoing efforts among Dallas City Council, Dallas Area Rapid Transit (DART), the Texas Department of Transportation (TxDOT), and the North Central Texas Council of Governments (NCTCOG) to determine the appropriate alignment for the rail line to alleviate anticipated future rail crossing issues as well as the interface with IH 345. However, since COVID-19 transit ridership and demand has changed, and traffic volumes have decreased in the downtown area. From a transit perspective, ridership is lagging, DART it is advancing a bus program that does not include major traffic signal upgrades, and current customers are traditional transit users who are not using transit as a choice. While population growth has continued, the growth has been less suburban and more rural which has an implication for transit. Similarly, consideration should be given to the location of employees who return to work as well as potential changes in large employer locations and functions of building structures. He noted the City of Dallas may remain interested in moving forward with the D2 project following review of changing trends or there

may be interest in advancing Phase 2 signal improvements for transit, as well as other options such as street cars or a Trinity Railway Express route to Fair Park. He also noted that the Silver Line and D2 are balanced investments on which the DART Board and City of Dallas have agreed. Mr. Morris noted as conversations continue with the City of Dallas and DART, inclusion of the D2 project in the Mobility Plan will also need to be discussed. Additional information was provided in Electronic Item 7. In addition, Mr. Morris noted that staff would continue to monitor the potential of an electric vehicle manufacturing facility being located within the region and would provide an update in the future. He also noted that the August 2022 RTC meeting has been postponed by one week and will be held on August 18, 2022, as part of the Irving Transportation Summit. He also discussed an upcoming item to be presented by staff at a future meeting, the 2023-2026 Management/Operations and Safety program.

- 8. Metropolitan Planning Organization Milestone Policy Round 2 Quarterly Update: Brian Dell provided an update on the status of the Metropolitan Planning Organization (MPO) Milestone Policy Round 2 projects. As a reminder the policy is aimed at ensuring that projects, especially those that have been funded for at least ten years and have not gone to construction, are being implemented in a timely manner. In February 2021, the Regional Transportation Council (RTC) approved the second round of the Milestone Policy, which included establishing deadlines by which projects must go to construction as well as a revised project tracking process. The updated process includes quarterly status reports on all projects on the Milestone Policy list until they go to letting. Projects are rated as low (green), medium (yellow), or high (red) risk based on the how well the project sponsor is implementing the projects and risk factors identified by staff. If the committed schedule has not been met and the project has been graded as red/high risk, the project will likely be recommended for cancellation but decisions will ultimately be made on a case-by-case basis. A summary of the projects on the Milestone Policy Round 2 list was provided. He noted that as of September 2021, three projects let prior to their established deadlines and 12 have been identified as low risk, 7 as medium risk, and 1 as high risk. The status of each project on the MPO Milestone Policy Round 2 list, including ratings, was provided in Electronic Item 8.1. Mr. Dell noted staff will continue monitoring project progress and provide assistance as needed, as well as provide information to the Committee at the next quarterly update. He added that staff was working with the implementing agency of the high-risk project to determine next steps. Additional details on the policy were provided in Electronic Item 8.2. John Polster asked if the Milestone Policy timeframe restarts on a project for which the Texas Department of Transportation has terminated a phase and executed a new Advanced Funding Agreement. He noted this may be an issue for some projects. Mr. Dell noted that although the project would likely remain on the Milestone Policy list of projects, consideration would be given regarding the noted circumstances during project review.
- 9. Transit Strategic Partnerships Initiative Overview: Rachel Jenkins provided an overview of the Transit Strategic Partnerships funding process. In fiscal year (FY), 2021 public transportation providers in the region were awarded approximately \$136 million in Federal Transit Administration (FTA) formula funds. Two processes are used to award funds. Of the total amount awarded, 2 percent is set aside for Transit Strategic Partnership projects (formally known as the Transit Call for Projects) based on Regional Transportation Council (RTC) policy, with the remaining 98 percent available to transit providers through the annual Program of Projects. Four types of federal formula funding programs are allocated in the Dallas-Fort Worth-Arlington and Denton-Lewisville Urbanized Areas (UZAs), two of which are allocated through the Transit Strategic Partnerships initiative: 1) Section 5307, intended to serve the general public including low-income populations and 2) Section 5310, intended to serve the elderly and individuals with disabilities. FY2021 Transit Strategic Partnerships

funding totals approximately \$4.1 million. Ms. Jenkins noted the process for awarding these funds was recently redesigned and updated to help address gaps in service. Through this program, staff will award proposals for innovative transit projects and solutions both from agencies looking to directly implement service and those seeking partnership with an existing transit provider. Proposals will be accepted on a rolling basis and evaluated twice per year. The improved process prioritizes projects that align with existing plans and studies, encourages innovative solutions to gaps in service, and offers a more proactive simplified approach to addressing needs throughout the region. In addition, the simplified application focuses on identifying challenges and gaps and encourages collaboration. Evaluation criteria details were highlighted, with the needs assessment given top priority. Details of the criteria and evaluation were provided in Electronic Item 9. Ms. Jenkins noted that applications will be accepted on a six-month rolling cycle with the exception of the initial application cycle launched September 1, 2021, which will be expedited to meet the January 28, 2022, Transportation Improvement Program (TIP) modification cycle deadline. Proposals can be submitted at any time. The deadlines allow staff to separate which proposals will be considered for evaluation at which time. Staff will proactively collaborate with applicants to fill missing pieces of the application or request additional documentation before the proposals are evaluated. Selected projects will then be submitted for TIP modifications and approvals. Proposals may potentially be selected on a conditional basis and staff will work with those applicants to address items that need further development prior to the next TIP modification deadline. She noted additional details were available at www.nctcog.org/strategicpartnerships-transit. Brian Moen asked if the findings from the Access North Texas update would be available for agencies to review during the application process. Ms. Jenkins noted the Access North Texas update was not expected to be released until next spring and that the 2018 Access North Texas document was available online for reference and was the version staff would be using during the evaluation process until the next update is adopted.

10. Status Report on Electric Vehicles and National Drive Electric Week: Soria Adibi presented an update on the electric vehicle (EV) industry and adoption in the region. She noted the electric vehicle market has expanded offerings of a variety of EV makes and models in recent years, including battery-electric, plug-in hybrid, and fuel cell electric options. Expansion has not only included light-duty vehicles, but a variety of medium and heavy-duty vehicle options. In the region, EV registration has grown approximately 32 percent year over year for the past five years and as of August 2021 over 18,000 lightduty electric vehicles are registered. A map identifying the location of electric vehicle registrations, as well as charging infrastructure was highlighted. She noted that as part of the new funding biennium, staff anticipated new incentives for EV purchases under the Texas Emission Reduction Program and charging stations through the Volkswagen Settlement to be announced soon. Ms. Adibi noted that when discussing electric vehicles. staff often receives questions regarding the volume of electric vehicles expected and the impact of electric vehicle charging to the power gird. As part of its long-term system assessment planning, the Electric Reliability Council of Texas (ERCOT) routinely completes a transportation electrification scenario. Assumptions based on Bloomberg New Energy Finance estimates the possibility that over 70 percent of all buses, slightly less than 20 percent of light-duty passenger vehicles, and approximately 15 percent of local delivery trucks on the road could be electric by the 2037. In addition, assumptions on the charging load indicate that most of the added load would be in the overnight hours. From a grid operator perspective. Texas continues to have excess generating capacity overnight to allow for vehicle charging. She noted staff will continue to monitor future assumptions as technology continues to advance. Ms. Adibi also provided information on an opportunity to test drive EVs available through the Clean Cities Coalition "Try and Drive Alternative"

program. Test drives are offered through four vendors in the region with timeframes ranging one day to two months. Also highlighted was information about 2021 National Drive Electric Week. A variety of webinars for fleets and the public will be available, as well as a tour of the Peterbilt manufacturing facility. An outdoor, in-person EV showcase will also be held with owners and vendors in Grapevine on October 3, and Oncor will be hosting the annual Road Rallies during the week of September 25-October 2. Additional information was provided in Electronic Item 10.

- 11. <u>Fast Facts:</u> Staff presentations were not given. Information was provided to members electronically for the following items.
 - 1. Air Quality Funding Opportunities for Vehicles (https://www.nctcog.org/trans/quality/air/funding-and-resources/fundingvehicle)
 - 2. Dallas-Fort Worth Clean Cities Events (https://www.dfwcleancities.org/events)
 - 3. Know Before You Fly Your Drone Workshops (<u>www.northtexasuas.com/UAS-Taskforce#Workshops</u>)
 - 4. Status Report on Texas Volkswagen Environmental Mitigation Program Funding (Electronic Item 11.1)
 - 5. Status Report on Ozone (Electronic Item 11.2)
 - 6. Federal Highway Administration Improving Bicycle Safety at the Intersection Workshop (Electronic Item 11.3)
 - 7. Results of Surface Transportation Technical Committee Survey on Changing Mobility Data (Electronic Item 11.4)
 - 8. North Central Texas Council of Governments Summary of Transportation and Air Quality Bills 87th Texas Legislature (Electronic Item 11.5)
 - Federal Highway Administration Recognizes City of Irving's Work through the Waze Data-Sharing Program (https://www.fhwa.dot.gov/innovation/everydaycounts/edcnews/20210902.cfm)
 - 10. August Online Input Opportunity Minutes (Electronic Item 11.6)
 - 11. October Online Input Opportunity Notice (Handout)
 - 12. Public Comments Report (Electronic Item 11.7)
 - 13. Written Progress Reports:
 - Local Motion (https://nctcog.org/trans/about/publications/locmo/local-motion-september-1)
 - Partner Progress Reports (Electronic Item 11.8)
- 12. Other Business (Old and New): Dan Kessler noted that the Metropolitan Planning Organization received a favorable letter from the US Department of Transportation certifying the Dallas-Fort Worth-Arlington, Denton-Lewisville and McKinney Transportation Management Area (DFW TMA) planning process as a result of the certification review completed in June 2021. Mr. Kessler thanked all who participated in the review process.
- 13. <u>Next Meeting</u>: The next meeting of the Surface Transportation Technical Committee is scheduled for 1:30 pm on October 22, 2021.

The meeting adjourned at 2:55 pm.

ELECTRONIC ITEM 2.2

Klyde Warren Park Extension Construction Funding Summary

Cost		Funding												
Funding Type	Federal		Local N	Natch										
Funding Source	RTC - STBG (80%) ^{1,2}	City of Dallas	Private Sector	Dallas County	Total (20%)	Grand Total ³								
Original Cost Estimate	\$30,000,000	\$6,199,100	\$0	\$1,300,900	\$7,500,000	\$37,500,000								
Cost Overrun	\$6,800,000	\$1,700,000			\$1,700,000	\$8,500,000								
Total Cost	\$36,800,000	\$7,899,100	\$0	\$1,300,900	\$9,200,000	\$46,000,000								

- 1: RTC = Regional Transportation Council, STBG = Surface Transportation Block Grant
- 2: \$10,000,000 of the Regional Transportation Council's (RTC) contribution to be paid back over time; ~\$3M from a Dallas TIF district with the rest from the private sector. The private sector repayment includes a 2.4% interest rate. The payback timeframe is through August 2035.
- 3: This summary only includes transportation elements. Non-transportation elements include another \$60 million.

NCTCOG BLUE-GREEN-GREY FUNDING INITIATIVE

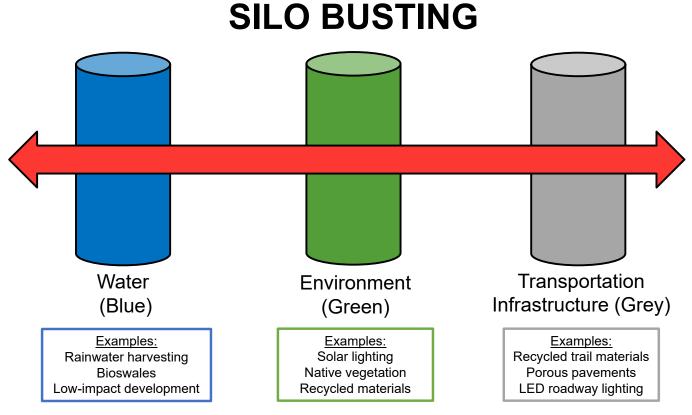

ROUND 3 PROJECT FUNDING RECOMMENDATIONS

PROGRAM BACKGROUND

BLUE-GREEN-GREY FUNDING INITIATIVE

Purpose

- 1. Promote the planning and construction of green or sustainable infrastructure in the region.
- 2. Advance small projects with innovative outcomes that can be replicated regionally.

BLUE-GREEN-GREY FUNDING INITIATIVE

Previous Rounds

FY 18: \$109,170 for three projects (RTC Local)

FY 19: \$138,500 for three projects (RTC Local)

Project reports at: http://www.nctcog.org/greeninfrastructure

2021 Round

Up to \$300,000 RTC Local available for the total; maximum of \$75,000 awarded to each applicant

Pre-application workshop: July 12, 2021

Proposals submittal period opened: July 19, 2021

Proposals due: August 12, 2021

Announce funding awards: October-December 2021

PREVIOUSLY FUNDED PROJECTS

Farmers Branch
Conceptual Bus
Stop Designs

Southlake
BioPod –
Burney Lane
Reconstruction

University Park Micro-Detention Project

DART Hatcher Station Pilot Program Bishop Arts
Bicycle Parking
Retrofitting Pilot

Watauga Biofiltration System

ROUND 3 EVALUATION AND PROJECT SELECTION

PROJECT EVALUATION

Scoring

Team qualifications – 10 points

Impact – 20 points

Innovation/Significance – 25 points

Applicability, Adaptation, Transferability, and Practicality – 30 points

Collaboration with Various Stakeholders – 15 points

Other Considerations

Equity

Does the project consider equity or attempt to address it?

Geographic Distribution

Are the projects spread throughout the region?

Diversity of Disciplines

Does the project involve various disciplines or areas of study?

PROJECT SUBMITTALS AND FUNDING RECOMMENDATION

RECOMMENDED FUNDING SUMMARY

Available funding:

Total funds available: \$300,000 RTC Local

Available amount per applicant: \$75,000

Recommended Project Funding Requests:

Bottom District Neighborhood Beautification: \$74,910

Allen Inlet Floatables Filter: \$75,000

UTA Biofiltration Swales Testing: \$51,500

Total recommended funding request: \$201,410

SUBMITTED PROJECTS SUMMARY

Projects Recommended for Funding	Composite Scores	Funding Requested
Laboratory Testing of Engineered Media for Biofiltration Swales – UTA / City of Fort Worth	7.78	\$51,500
Bottom District Neighborhood Beautification – DesignJones LLC / City of Dallas	7.53	\$74,910
Inlet Floatables Filter – Huitt-Zollars / City of Allen	6.88	\$75,000
		Subtotal: \$201,410

INLET FLOATABLES FILTER - CITY OF ALLEN

Problem:

- City must upgrade to Phase II Level 4 of TCEQ stormwater permitting requirements by 2024
- Must implement system to reduce discharge of floatables in two locations
- Current use of proprietary inlet filter system at construction sites is costly and difficult to maintain

Project details:

- Develop modified inlet design for the collection and removal of debris and floatables during active construction
- Inlet will be scalable, inexpensive, provide a permanent solution, and more effective at removing floatables
- First phase will include review of best practices and coordination with stormwater infrastructure manufacturers
- Project will and involve STEAM students from Allen ISD

Deliverables:

- Concept-level design details and inlet plan
- Maintenance requirements and materials specifications
- Debris collection data

Funding requested: \$75,000

BOTTOM DISTRICT NEIGHBORHOOD BEAUTIFICATION - CITY OF DALLAS

Problem:

- Historically underserved neighborhood located in the floodplain
- Neighborhood is more susceptible to environmental disasters due to degraded infrastructure and underinvestment

Project details:

- Aims to establish a green infrastructure network development plan in the area
- Project team will develop conceptual small-scale design applications
- Outcome will include beautification design guidelines and a small-scale pilot project

Deliverables:

- Blue-Green-Grey neighborhood beautification design guidelines
- Suggest locations for implementing GI network
- Sample designs for small-scale GI applications
- Small-scale pilot project

Funding requested: \$74,910

LABORATORY TESTING OF ENGINEERED MEDIA FOR BIOFILTRATION SWALES - UTA

Problem:

- Runoff from roadways contain many pollutants that contaminate water
- TCEQ-recommended best practices are difficult to implement in large urban areas
- There is not enough information or data regarding other pollutant removal technologies

Project details:

- Install and monitor a scaled expanded shale engineered filtration media in controlled lab
- Project will test the performance and effectiveness of expanded shale for bioswales this has not been done before
- Outcomes to include design criteria, implementation recommendations, detailed literature review of application of expanded shale

Deliverables:

- Detailed literature review of current state of the application
- Design criteria and implementation recommendations
- Research report

Funding requested: \$51,500

OTHER CONSIDERATIONS

Project	Equity Considerations	Geographic Distribution	Diversity of Disciplines
Inlet Floatables Filter	None for pilot, but could be applied anywhere	Collin County	Municipal stormwater- focused
Bottom District Neighborhood Beautification	Pilot project located in underserved area	Dallas County	Neighborhood revitalization
Laboratory Testing for Biofiltration Swales	None for pilot, but could be applied anywhere	Tarrant County	Research-oriented

Requested Action

- Recommend Regional Transportation Council Approval of:
 - The proposed list of projects to fund through the Blue-Green-Grey funding program Round 3, as provided in Electronic Item 3.2.
 - Administratively amending the TIP/STIP and amending other planning/administrative documents to incorporate these changes.

2023-2026 MANAGEMENT AND OPERATIONS (M&O), NCTCOG-IMPLEMENTED, REGIONAL/AIR QUALITY, AND SAFETY PROJECTS FUNDING PROGRAM

Surface Transportation Technical Committee
October 22, 2021

BACKGROUND

- Surface Transportation Technical Committee (STTC) and Regional Transportation Council (RTC) typically consider extending existing and funding new Air Quality and Management and Operations projects/programs every few years
- Last review occurred in 2018-2019 and projects were funded through Fiscal Year (FY) 2022

PURPOSE AND NEED

- Provides funding in addition to Transportation Planning Funds (TPF) so staff can conduct various operations, planning, and implementation activities (e.g., environmental justice and data collection efforts)
- Surface Transportation Block Grant (STBG), Congestion Mitigation Air Quality Improvement Program (CMAQ), Regional Toll Revenue (RTR), and RTC/Local funds will most likely be proposed for the FY 2023-2026 program
- Ensures that existing programs and projects that are being continued can do so without interruption in FY 2023-2026
- Assigns resources for RTC priorities and air quality initiatives

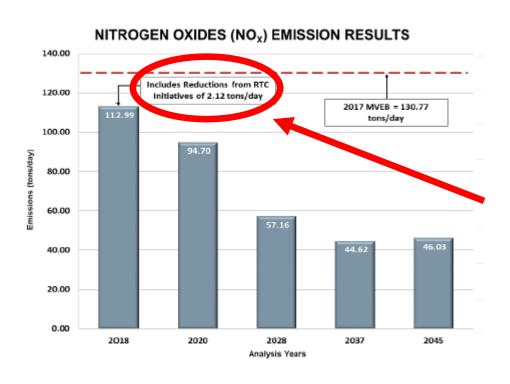

WHAT IS THE PROCESS?

- Staff is in the process of determining the amount of funding needed for this program.
- The requests will then be evaluated, and a set of projects will be proposed.
- Typically, \$15-20M is programmed per fiscal year. This need may decrease with increased federal planning funds.
- A significant portion of the funding is pass-through to other agencies (e.g., Mobility Assistance Patrol and Vanpool programs) and the rest covers NCTCOG staff time to coordinate, plan, and lead these activities.

PROGRAM AND PROJECT TYPES

- Management & Operations
 - (Mobility Assistance Patrol, Transit Operations, etc.)
- NCTCOG-Implemented
 - (Project Tracking, Planning Efforts, etc.)
- Regional/Air Quality Projects and Programs
 - (Aviation, Freeway Incident Management, Employer Trip Reduction, Data Collection, Regional Traffic Signal Retiming etc.)

IMPORTANCE OF REGIONAL AIR QUALITY AND M&O PROJECTS

- Air Quality Conformity test results must be below EPA's Motor Vehicle Emission Budget (MVEB).
- Previous Regional Transportation Council Initiatives (air quality projects and programs) have allowed region to pass Conformity.
- When the MVEB is reset next year, these programs can help tip the scales if regional Conformity is uncertain.

STATEWIDE SAFETY PROGRAM

- NCTCOG staff proposes that the region take a leadership role on a program to improve safety and reduce fatalities on our transportation system.
- The region would partner with the State as part of a larger statewide initiative.
- A more detailed proposal will be brought back to the committee for review and approval.
- Plan to utilize Coronavirus Response and Relief Supplemental Appropriations Act (CRRSAA) funding that was added to the region's STBG allocation in FY 2022 to supplement this program

NEXT STEPS

- Finalize the amounts of funding to be requested, along with the specific list of projects and programs to be recommended for funding
- Bring back the list to the public and the committees for review and approval

PROPOSED TIMELINE

Meeting/Task	Date
STTC Information	October 22, 2021
RTC Information	November 11, 2021
Public Involvement	December 2021
STTC Action	December 3, 2021
RTC Approval of M&O Funding Program and TIP Modifications to Add Projects to the TIP	January 13, 2022/April 7, 2022
State/Federal Approval of Individual Projects	April 2022/July 2022

FISCAL YEAR 2021 & 2022 PROJECT TRACKING

Surface Transportation Technical Committee
October 22, 2021

BACKGROUND

- Due to significant implementation delays on projects across the region and a need to better maintain the region's funding balances, a more robust project tracking effort was created to highlight and prevent these delays.
- At the beginning of each fiscal year, the Surface Transportation Technical Committee (STTC) and the Regional Transportation Council (RTC) are provided a list of projects by phase scheduled to advance during the coming year.
- Agencies are being asked to report project status on a more frequent basis.
- The status of projects scheduled for the year will continue to be presented at STTC and RTC on a quarterly basis.
- This process will provide opportunities for sponsors to raise issues that may be hindering a project's progress and help ensure that funds are being obligated in a more timely manner.

SUMMARY OF TIP FY 2021 PROJECT FUNDING – CMAQ (\$ IN MILLIONS)

	NOVEMBER 2020	OCTOBER 2021
Federal Funding Allocated in FY 2021	\$73.9	\$73.9
Estimated Federal Carryover Funds (FY 2020 to FY 2021)	<u>+\$58.4</u>	<u>+\$41.9</u>
Total Available Federal Funding in FY 2021	\$132.3	\$115.8
Total Federal Funding Programmed ¹	\$121.2	\$115.5
Federal Funding Obligated (2021) ^{2, 4}	\$0	\$94.1
FY 2021 Project Phases ³	61	46

^{1:} Programmed funding is comprised of what is included in the TIP as well as transactions that have not formally been made in the TIP (e.g., early obligations)

^{2:} Obligations based on the federal fiscal year, which runs from October to September

^{3:} Number of phases has been adjusted as projects were advanced to FY 2020 and added into FY 2021

^{4:} Obligation amounts as of 10/11/2021

SUMMARY OF FY 2021 PROGRESS

- FY 2021 has ended and:
 - 81 percent of CMAQ funds were obligated
 - 151 percent of STBG funds were obligated
 - 83 percent of TA-Set Aside funds were obligated
- Increased tracking led to improvements in obligation rates across all 3 categories.
- The STBG/Category 2 funding partnership was successful in reducing the region's STBG carryover balance.
- More STBG was obligated than programmed due to the State requesting to obligate additional STBG in our region since other regions and states left STBG funds on the table.
- Sufficient TA Set Aside funds obligated to avoid lapsing in FY 2021.

SUMMARY OF TIP FY 2022 PROJECT FUNDING - CMAQ

^{2:} Obligations based on the federal fiscal year, which runs from October to September

^{3:} Obligation amounts as of 10/11/2021

NEXT STEPS

- Continue monitoring project progress and working with project sponsors and TxDOT to resolve issues that may be causing delays in project implementation.
- Provide quarterly updates on FY 2022 projects
- Continue monitoring for possible lapse of funding

Local Government Energy Reporting

Section 388.005 Texas Health and Safety Code:

Purpose: Aid efforts to attain federal air quality standards by reducing demand for electricity generation.

Who Reports: Political subdivisions, institutes of higher education, or state agencies in 41 "affected counties" in Texas.* Political subdivisions include cities, counties, water districts, and other local government entities.

Requirements: Establish a goal of reducing electric consumption by at least 5% each year for 7 years beginning September 1, 2019 and submit an annual report to SECO regarding the progress and efforts to meet the reduction goal

*Bastrop, Bexar, Brazoria, Caldwell, Chambers, Collin, Comal, Dallas, Denton, El Paso, Ellis, Fort Bend, Galveston, Gregg, Guadalupe, Hardin, Harris, Harrison, Hays, Henderson, Hood, Hunt, Jefferson, Johnson, Kaufman, Liberty, Montgomery, Nueces, Orange, Parker, Rockwall, Rusk, San Patricio, Smith, Tarrant, Travis, Upshur, Waller, Williamson, Wilson and Wise (Texas Administrative Code, Title 30, §114.629)

LOCAL GOVERNMENT ENERGY REPORTING

The Texas Health and Safety Code §388.005(c) requires each political subdivision in a non-attainment area or an affected county to establish a goal to reduce electric consumption by at least five percent each state fiscal year. In 2019, the 86th Legislature passed Senate Bill 241, extending the timeline for this requirement seven years beginning September 1, 2019.

Each political subdivision, institution of higher education or state agency must submit a report annually to SECO regarding the entity's progress and efforts to meet the five percent annual reduction goal. The deadline to submit reports is February 1, 2021. An entity that does not attain the established goals must justify in their annual report to SECO that the entity has already implemented all cost efficiency measures.

Who Reports

The reporting requirements apply to each political subdivision, institution of higher education and state agency facility located in the 41 non-attainment areas or affected counties in Texas: Bastrop, Bexar. Brazoria, Caldwell, Chambers, Collin, Comal, Dallas, Denton, El Paso, Ellis, Fort Bend, Galveston, Gregg, Guadalupe, Hardin, Harris, Harrison, Hays, Henderson, Hood, Hunt, Jefferson, Johnson, Kaufman, Liberty, Montgomery, Nueces, Orange, Parker, Rockwall, Rusk, San Patricio, Smith, Tarrant, Travis, Upshur, Waller, Williamson, Wilson and Wise.

DC FAST CHARGING AND HYDROGEN FUELING

Total Statewide Allocation = ~\$21 Million First-Come, First-Served from November 2, 2021-January 3, 2022

Materials Posted at <u>www.texasVWfund.org</u> under "Grants" Tab

Purchase/Installation of:

DC Fast Charge EV Charging Stations
Up to \$150,000 per Charger
Maximum \$600,000 per Site
Maximum 5 Sites in 90 Days
Hydrogen Fueling Infrastructure
Up to 25% or 33% Depending on
Volume of Fuel Dispensed
Maximum \$600,000 per Site

DC Fast Charge Stations Ideal for Sites where Drivers Stop for Shorter Periods of Time, Such as:

- Fueling Stations/Travel Plazas
- Fast Food/Quick Service Restaurants
- Certain Retail

Initial Eligibility Prioritizes Sites Along Highway Corridors

Surface Transportation Technical Committee Meeting
October 22, 2021

North Central Texas Council of Governments

Managed Lane System

2

Toll Managed Lane Data Monitoring

Cumulative December 2013 – October 2021

How much HOV 2+ Subsidy has the RTC been responsible for?

\$ 6,444,272 as of October 2021

How much of the Vanpool Toll reimbursement has the RTC been responsible for?

\$ 12,407 from October 2014 – October 2021

How long can the RTC keep the HOV policy at 2+?

For now, it remains 2+ and it will continue to be monitored quarterly

Have there been any additional NTTA customer service needs?

No, minimal impact

Have the speeds on the Toll Managed Lane facilities dropped below 35 mph?

No

Toll Managed Lane Data Monitoring

Cumulative December 2013 – October 2021				
Facility	HOV 2+ Subsidy Costs	NTTA Customer Service (Additional Needs)	Project Performance Events (Speeds < 35 mph)	
North Tarrant Express • SH 183/121 from IH 35W to SH 121 • IH 35W from IH 30 to US 287	\$3,132,706	Negligible	0	
 LBJ Express IH 635 from Preston Road to Greenville Avenue IH 35E from Loop 12 to IH 635 	\$3,311,566	Negligible	0	
DFW Connector SH 114 from Kimball Avenue to Freeport Parkway	N/A	Negligible	0	
IH 30 Managed Lanes IH 30 from SH 161 to Westmoreland Road	N/A	Negligible	0

FROM: Michael Morris, P.E.

Director of Transportation

SUBJECT: Announcement for the November 2021 "Virtual" Traffic Incident Management

Executive Level Course

As the Metropolitan Planning Organization for the Dallas-Fort Worth area, the North Central Texas Council of Governments (NCTCOG) developed Traffic Incident Management (TIM) Training courses to initiate a common, coordinated response to traffic incidents that will build partnerships, enhance safety for emergency personnel, reduce upstream traffic crashes, improve the efficiency of the transportation system, and improve air quality in the Dallas-Fort Worth region. In 2020, the 16-county Dallas-Fort Worth region experienced 111,227 total reportable crashes, of which 36,579 were injury crashes, and 786 were fatal crashes. These statistics prove that training for agencies responsible for managing and clearing traffic incidents is extremely important and have demonstrated the ability to improve responder and motorist safety and to significantly reduce the length and size of roadway closures.

Since February 2003, 121 classes have been offered at the first responder level to 3,266 students in the areas of police, fire, department of public safety, towing, EMS, Mobility Assistance Patrol, transportation agencies, and media representatives. Additionally, since February 2005, 31 classes have been offered at the executive level to 1,146 decision and policy makers. It is important to note that the NCTCOG TIM Training Course is equivalent to the course offered by Federal Highway Administration (FHWA); however, the NCTCOG course content is specific to the North Central Texas region. NCTCOG TIM Training Course participants can also earn continuing education credit for Texas Commission on Law Enforcement (TCOLE), Track Type II Fire, and Texas Department of State Health Services for EMS. For your reference, summaries of the regional attendance levels for the NCTCOG's First Responder and Manager Course and the Executive Level Course can be found on NCTCOG's Traffic Incident Management Training Program web page at www.nctcog.org/TIMTraining.

Although the NCTCOG TIM training has been very successful, it can be even more successful with the assistance and continual involvement of decision makers such as you. In order to have compliance at the first responder level, it is of vital importance that agency decision makers have an understanding of what is required of all responders during an incident; this includes police officers, fire fighters, tow truck operators, roadway construction crews, and mobility assistance crews, etc. Understanding the importance of incident management training, the Texas Commission on Fire Protection passed Rule 435.29 in July 2015, which requires

Page Two October 4, 2021

completion of a minimum four-hour FHWA Traffic Incident Management program for all certified firefighters before December 1, 2020. Additionally, TCOLE incorporated a four-hour TIM training component into the Basic Peace Officer Course curriculum for new cadets/recruits as of April 1, 2020.

The Executive Level Course provides you with an overview of the two-day First Responder and Manager Course. Additionally, the Executive Level Course also includes a preview of the updated ANSI vest standards. Those agencies that have participated in the training prior to 2013 are strongly encouraged to attend again, as major course updates have occurred since then, as well as updates to legislation and best practices. Important to note is that agency attendance at the TIM training is a scoring component in the 2021 NCTCOG TIM Freeway Blocking Equipment Call for Projects.

You are invited to attend the virtual Traffic Incident Management Executive Level Course scheduled for Thursday, November 4, from 10 am to 12 pm. A link to the meeting information is included at www.nctcog.org/TIMTraining.

Please register through our event page at www.eventsquid.com/event/14553 or contact Barbara Walsh of NCTCOG at bwalsh@nctcog.org or 817/695-9245. We look forward to your participation on November 4, 2021.

Michael Morris, P.E.

EXECUTIVE LEVEL

INCIDENT MANAGEMENT TRAINING OPPORTUNITY

NOVEMBER 4, 2021 | 10AM - 12PM | VIRTUAL TEAMS MEETING

INCREASE INCIDENT RESPONSE. DECREASE DRIVER DELAY.

Join us for the Traffic Incident Management Executive Level Course hosted by the North Central Texas Council of Governments (NCTCOG).

The course is designed to educate decision and policy makers on the importance and benefits of effective incident management. It also encourages common, coordinated response to traffic incidents, a source of significant delays in our rapidly growing region.

Goals of the Traffic Incident Management Executive Level Course:

- Building partnerships with local emergency response agencies
- Enhancing safety for emergency personnel
- Reducing upstream traffic accidents
- Improving the efficiency of the transportation systems
- Improving air quality in the Dallas-Fort Worth Region

Please register through our event page at: www.eventsquid.com/event/14553 or contact: BWalsh@nctcog.org | 817.695.9245

Immediate Action Freeway Projects: State Contingency

In August 2021, the Texas Transportation Commission (TTC) approved the Unified Transportation Program and will review project commitments scheduled for the December 2021 TTC meeting. It is critical for the region to reinforce major freeway projects that can currently go to construction if the TTC wishes to reprioritize projects in other parts of the state that are not currently available to proceed.

The Regional Transportation Council, working closely with local governments and Texas Department of Transportation Districts, always has major transportation projects ready for construction. This has benefited the region tremendously over the last several decades. With a possible delay in freeway projects in other parts of the state and the possibility of a new federal transportation stimulus program, having projects ready to proceed remains a significant funding tool.

Examples of projects in the Dallas District that fall into this category are US 380 in Collin County, SH 114 in Denton County, and SH 183 in Dallas County. Examples of projects in the Fort Worth District in Tarrant County that fall into this category are the IH 820/IH 20 "Y Connector" Extensions, DFW Connector, and SH 183. In addition, other projects would be eligible, and staff looks forward to opportunities at both the national and state level.

REGIONAL TRANSPORTATION COUNCIL ONLINE INPUT OPPORTUNITY

HOV Pilot Project Along US 75 Corridor

Public/Private Partnership: SH 183 Segment 2 East

National Drive Electric Week (NDEW)

Locally Enforced Motor Vehicle Idling Restrictions

Regional Comprehensive Emissions Reduction Program

Proposed Modifications to the List of Funded Projects

Online Public Input Opportunity Dates

Monday, September 13, 2021 - Tuesday, October 12, 2021 - The North Central Texas Council of Governments (NCTCOG) posted information at www.nctcog.org/input for public review and comment.

Purpose and Topics

The online public input opportunity was provided in accordance with the NCTCOG Transportation Department Public Participation Plan, which became effective June 1, 1994, as approved by the Regional Transportation Council (RTC), the transportation policy board for the Metropolitan Planning Organization (MPO) and amended on November 8, 2018. Staff posted information regarding:

- 1. HOV Pilot Project Along US 75 Corridor
- 2. Public/Private Partnership: SH 183 Segment 2 East
- 3. National Drive Electric Week (NDEW)
- 4. Locally Enforced Motor Vehicle Idling Restrictions
- 5. Regional Comprehensive Emissions Reduction Program
- 6. Proposed Modifications to the List of Funded Projects

The NCTCOG online public input opportunity was provided to inform and seek comments from the public. Comments and questions were submitted by email at transinfo@nctcog.org, online at www.nctcog.org/input, by mail at PO Box 5888, Arlington, TX 76005 and by fax at 817-640-3028. Printed copies of the online materials were also made available by calling 817-608-2365 or emailing cbaylor@nctcog.org.

Summary of Presentations

HOV Pilot Project Along US 75 Corridor presentation:

https://www.nctcog.org/nctcg/media/Transportation/DocsMaps/Involve/InputMeetings/2021/09/HOVPilot.pdf

In partnership with NCTCOG staff and local jurisdictions, the Texas Department of Transportation (TxDOT) has been working to find long-term solutions for reducing congestion along the US 75 corridor. This presentation includes detailed information regarding a short-term initiative that will help solve the issue.

The first component of the initiative, which has been allocated approximately \$43.8 million by TxDOT and the Regional Transportation Council for implementation, involves removing the pylons in the corridor that delineate the HOV lanes and turning them into a technology lane. The goals for this component include reducing fatalities, reducing congestion by opening the technology lane to all passenger vehicles, improving response to crashes, improving air quality and enhancing traffic signal green times on frontage roads to progress traffic.

The second component of the initiative involves implementing an HOV pilot project funded by a \$10 million federal grant known as the Surface Transportation System Funding Alternatives (STSFA) Award. This pilot will be a voluntary program, NCTCOG staff will recruit volunteers to participate and an HOV incentive will be provided via the existing GoCarma application that is currently utilized on all TEXpress Lanes.

The technology lane along the US 75 corridor is expected to go to construction in the summer of 2022, and the pilot project will begin within next few months.

Public/Private Partnership: SH 183 Segment 2 East presentation:

https://www.nctcog.org/nctcg/media/Transportation/DocsMaps/Involve/InputMeetings/2021/09/S H183.pdf

A public/private partnership was developed to ensure the construction of the North Tarrant Express (NTE) is completed, and NCTCOG has been working with both public and private entities to advance SH 183 Segment 2 East as the next phase of the NTE.

Under the current contract with the Texas Department of Transportation (TxDOT), Cintra, the private sector partner for the project, is required to make improvements to Segments 1 and 2W by widening the freeway. When this widening occurs, there will be a lane imbalance on the Segment 2 East portion of the NTE, which will create an additional safety and congestion issue. Since Segment 2 East is under a deferred segment contract, Cintra will be providing funding to TxDOT to help balance the lanes along the corridor.

A breakdown of the funding allocations for the NTE can be found on the presentation slides posted at www.nctcog.org/input.

National Drive Electric Week (NDEW) presentation:

https://www.nctcog.org/nctcg/media/Transportation/DocsMaps/Involve/InputMeetings/2021/09/NDEW.pdf

There are currently more than 18,000 registered electric vehicles (EVs) in North Texas, and the average annual growth rate in the region from 2015 to 2020 was 32.5 percent. Additionally, North Texas Fleets added approximately 23 new plug-in EVs in 2020.

Each year National Drive Electric Week (NDEW) is held to raise awareness about EVs and provides chances for direct conversation with EV owners as well as test driving opportunities. This year, NDEW activities will take place from Saturday, September 25 through Saturday, October 2, and NCTCOG staff will conclude the week's festivities with an outdoor event on Sunday, October 3 at The REC of Grapevine.

For more information and to register for NDEW 2021 activities, visit www.driveelectricdfw.org.

Locally Enforced Motor Vehicle Idling Restrictions presentation:

https://www.nctcog.org/nctcg/media/Transportation/DocsMaps/Involve/InputMeetings/2021/09/Id ling.pdf

The Regional Transportation Council (RTC) Resolution Supporting Locally Enforced Motor Vehicle Idling Limitations in North Central Texas (R08-03) originally took effect in 2008 and impacts medium to heavy-duty vehicles that weigh more than 14,000 pounds. The resolution states vehicles cannot idle for more than five minutes, although there are 13 exemptions based on specific circumstances. Controlling motor vehicle idling helps the Dallas-Fort Worth (DFW) region to reduce tail pipe emissions, and this is important because DFW does not meet federal ozone standards.

Over the years cities and counties in DFW have signed agreements with the Texas Commission on Environmental Quality (TCEQ) as well as passed city ordinances and county resolutions to help enforce idling restrictions. Many of the TCEQ agreements have expired, and NCTCOG is proposing to revise the resolution to encourage local governments to implement idling restrictions that fit their needs.

The RTC will take action on the resolution revision on Thursday, October 14, 2021.

Regional Comprehensive Emissions Reduction Program presentation:

https://www.nctcog.org/nctcg/media/Transportation/DocsMaps/Involve/InputMeetings/2021/09/CER.pdf

Because the Dallas-Fort Worth region is in nonattainment for both the 2008 and 2015 ozone standards, NCTCOG staff continue to work on various emissions inventories to help reach attainment. Various local governments have also requested NCTCOG assist in coming up with strategies to specifically reduce greenhouse gas emissions.

Staff is working on a regional emissions inventory and building an emissions reduction toolkit for local cities and private sector companies. Through this toolkit, NCTCOG is expanding emissions reduction strategies and incorporating economic growth, environmental justice, equity, applicability, feasibility, cost per ton and emissions impact.

Additional information regarding the toolkit can be found in the full presentation at www.nctcog.org/input.

Proposed Modifications to the List of Funded Projects handout:

https://www.nctcog.org/nctcg/media/Transportation/DocsMaps/Involve/InputMeetings/2021/09/TIP-Mods.pdf

A comprehensive list of funded transportation projects through 2024 is maintained in the Transportation Improvement Program (TIP). Projects with committed funds from federal, State and local sources are included in the TIP. To maintain an accurate project listing, this document is updated on a regular basis.

The current modification cycle includes project updates and funding adjustments for transportation initiatives in Collin, Dallas, Denton, Kaufman, Parker, Tarrant and Wise Counties.

Additionally, financial adjustments related to public transportation services managed by Trinity Metro and Dallas Area Rapid Transit (DART) are also included.

HOV Pilot Project Along US 75 Corridor

Kyle Grout

I have a comment/slash idea. Can you remove the barriers as proposed so single occupancy vehicles can use the lane, but limit the single occupancy vehicles to the non-peak hours? During peak hours like rush hour the lane can operate as HOV only. The hours can be displayed by signs. In this option no one gets paid to use the lanes and no one has to pay to use the lanes.

I've lived in an area where this was implemented, and it worked great.

Crysti Bethel

Thank you for considering various options for 75 HOV. I propose that only those with two or more in a vehicle or in an electric vehicle can use the HOV lane. That will help with congestion and support environmental improvement efforts.

Nathan Jackson

I'm a McKinney resident in Craig Ranch who regularly uses 75 for my trek to and from work. More importantly, I use the HOV lane every morning to transport my family of four to work and school at the Forest and Inwood area. I think the plan to allow solo drivers to use the HOV lane is an absolutely horrendous idea. That action alone will nullify the usefulness of the HOV lane altogether and will exponentially over crowd that lane, thus de-incentivizing me to use it ever again. Furthermore, the proposed monetary reward for having multiple people in my car while in the HOV lane pales in comparison to the reward of having no cars in that lane each morning allowing me to bypass the rest of traffic.

Please consider NOT allowing solo drivers in that lane moving forward!

Diane Glidewell

I live in Richardson... already enough empty HOV lanes on the interstates so as a tax payer and voter, "NO". It is a waste of money and time.

Michael Winnick

I rarely use an HOV lane.

Cyndi O'Bannon

I do not like having just a single lane because if I am behind a slow driver, I am stuck at his speed. In the case of a breakdown, I am risking being stuck until someone is able to rescue the vehicle. There are too few exits available many times and I cannot get out of the lane in time to

make my needed exit. And last, the extra cost imposed doesn't make economic sense for the 5 minutes I might save.

The simplest plan is to let everyone use the HOV lanes without charge. Traffic is fluid, but HOV lanes are rigid. I believe they slow down traffic for everyone! Having 5 lanes will speed up traffic because it is less likely that you will get stuck behind a slow-moving vehicle without ability to change lanes.

It has always irritated me that it is almost impossible for drivers from Plano and Richardson to maneuver into those left lanes, so the HOV lanes benefit drivers from Allen and McKinney who do not pay the DART sales tax. It also irritates me that in creating the HOV lanes no new concrete was poured. They just re-striped the existing four lane highway into five lanes. I believe it made traffic more dangerous because we have to navigate narrower lanes while losing the left shoulder for emergencies.

The final suggestion to spend lots of money to find a way to monitor traffic so you can give bonuses to high occupancy vehicles really disturbs me. I think all that vehicle monitoring (as opposed to traffic flow monitoring) is a definite infringement upon our freedom and our privacy. It's also a way to squander money on something that presents only a hypothetical not a tangible gain.

Jackson Hurst

I approve and support NCTOG's HOV Pilot Project on US 75. This pilot project will help reduce congestion.

Jimmy Estes

Remove barriers and open to public. Keeping any barriers leads to blockage of many lanes for maintenance.

Gina Ward

If solo drivers are allowed to use the HOV lane for free or for a fee, it will end up just as congested as the rest of the highway. It should be for more than 1 person in a car. The rules are not being followed now - there are no officers giving tickets. I'm from Miami and the HOV lanes were well controlled because of patrol and easy to get in and out of instead of having those rubber things.

Please do not allow solo drivers to use this lane, even if they pay.

Marie Talamini

I would be interested in supporting this pilot project. Our household uses the HOV lane multiple times daily with 2+ and we also use the US75 corridor for single user as well.

Jamie Thompson

I just read the article on getting more use out of the HOV lane on 75 and have some thoughts.

Yes. Single person cars using it would help ease some congestion on the main lanes. However,

many people in general would like to use the HOV lane to bypass all of the ramps as they may be heading on a long haul to/from McKinney. I travel from Spring Creek Rd to McKinney and would definitely like to bypass all of the merging traffic.

Would it be feasible to have people register with NTTA on how many people they normally have in their car and then charge them to use the HOV lane based on that? I know that could open a whole can of worms and people could lie but cameras could show occupants if installed in the areas of tracking.

Are there thoughts on how to reduce large maintenance/shipping trucks/big rigs from using the HOV lanes?

Are there plans to clean up debris and maintain this long stretch of highway?

Thank you for continuing to look for ways to help improve traffic flows!

Andy Smith

Thank you so much for starting the process on removing these separation poles from the roadway! I think the idea of keeping the lane free for solo drivers is beneficial. With Collin County continuing to grow the way it is, it essentially adds another general-purpose lane without having to redo the whole highway like 635 East currently. This could buy TxDOT a little more time for the inevitable redo of US 75 from downtown Dallas to McKinney (which it's already in desperate need of).

Even if the decision is to toll the lanes or use that new technology to see the occupancy of the vehicles, that's fine. As long as those awful barrier poles are taken down ASAP. Those are so dangerous when people run them over and break them. I have seen so many wrecks happen because of those and the debris just stays on the highway for days. Maybe a double solid line would work if the plan is to continue to keep them separate from the general traffic.

Thank you for giving the public an opportunity for input.

Roger Nordmeyer

We would like to see the HOV lanes dismantled as they are a traffic hazard. Signage has never been clear, particularly about where one can exit the lanes and this has resulted in many near collisions as people dart across traffic or drive over the barriers. Please just open up the roads.

Bob Tragesser

This is the most stupid idea one could ever imagine! \$10M to implement a system to reward drivers for using the HOV lanes? Take down the barriers and just open the lanes for regular, non-HOV use!

Warren Caldwell

Greetings and thank you for the opportunity to contribute to the discussion on managing the (currently) HOV lanes on 75. I am the current President of the Canyon Creek Homeowner's Association.

Option 1 is far preferable as a means of accelerating the broader use of the lanes. I have long questioned the thought process that a driver would make the decision to carry additional passengers based upon the existence of an HOV lane. Most either have passengers or do not and an underused lane is not an appropriate use of our resources whether they be capital related or a loss of human productivity by those artificially impeded from efficient traffic flow.

The removal of the bollards will be greeted with an audible cheer by our neighborhood which comprises 2850 homes and approximately 10 % of Richardson's population. The happiness of our neighborhood will be eclipsed by that of our First Responders who have long had to cope with the added frequency of accidents and damage to their equipment caused by the bollards.

For many years, Richardson has been denied a reasonable access to the lanes and a solution going forward should account for and add convenient and friendly access for our growing city of 125,000.

We are appreciative for your work and expertise in crafting sorely needed improvements to the current approach. I have copied our HOA Community Outreach Director and our Past President. Please reach out anytime.

Justin Pike

The idea to charge single riders is a terrible idea. However, something needs to be done. I drive that stretch daily north and south. When the main lanes back up I see single riders OFTEN jump into that lane some over the barriers even. It's a plague. These people think they are above the law and there are ZERO repercussions for them. We really should enforce current laws before trying to change them but maybe a charge would make them think twice or it would just be another source of issue by trying to collect from them and then dodging paying for it. Single riders are already very regularly using the HOV lanes and it disgusts me!

Finn-Erik Juliussen

I am writing in regards to the survey on the HOV lanes on US-75. I would like to see them totally removed and open to everyone. I have no problem with the ramps just North of US-75 remaining in place. Since these HOV lanes were originally opened I have watched dozens and dozens of accidents due to these lanes and have had numerous close calls when people cut into the HOV lane from the stopped traffic in the main lanes. F-350's do NOT stop well from 60mph when idiots cross illegally into the lanes. I have seen plenty of rear end collisions from this.

I have seen people drive over the barriers whether the plastic delineators are up or sheared off at the base. The bases rarely get torn off but when you drive over them at higher speeds, say 30mph+ the large bumps unsettles the suspension and can cause vehicles to lose control and crash. I've seen several of those crashes.

We have a HUGE safety problem when a car becomes disabled in the HOV lane. In the majority of the places there is no room to get around them. The people in the stalled vehicle have to decide do I want to sit in the car with my seat belt on and get rear ended at 70mph, or do I get out and stand next to my car and hope the collision does not kill me, or jump over the wall on the other side and have 70mph cars passing within inches of me. I guess there is a 4th option. They could play a real live version of the 1980s Frogger arcade game. Most motorists do not have 3 lives to start with and pedestrian splats make for even more enormous delays.

We also create the same problem in the inner left lane (not the HOV lane) as there is no shoulder for cars that break down or crash. This is a problem in numerous places around the Metrolplex and SHOULD NEVER be designed like this!

Breakdown lanes used to always be built. This is an incredible safety feature. If you run out of gas or need to change a tire you have a place where you can do it in a less risky environment. If you have a minor crash the cars can be moved to the breakdown lane as well. I drive 50-80,000 miles per year and have for decades. Where there is a breakdown lane with a disabled vehicle it is not uncommon to see traffic keep moving at normal speed. If it slows it is not by much in most cases. When a car stops in the lane of traffic the delays immediately build and traffic slows MUCH more. In my anecdotal evidence from spending time on the highways you see vastly more accidents when cars break down in the road with nowhere to go.

Another benefit of breakdown lanes is if a car needs to be towed or filled with gas the tow truck can also be in the breakdown lane working on it and not be blocking traffic in many cases.

Yet another benefit is when you have a breakdown lane it gives more room for error as there is extra pavement to drive on should they hydroplane, get distracted and wander out of the lane, steer around the sofa that fell in the left lane, etc.

What I would like to see is 5 lanes open to EVERYONE (ok, not pedestrians and bicycles but you get the point) and with a breakdown lane where possible. Some areas you can fit one and others you can't. Still an extra 3' from the wall will reduce accidents.

I have to wonder about the studies that show that HOV lanes help traffic. In my observations around the country they do not speed traffic in the regular lanes. They actually slow it down because you lose the breakdown lane. I do not think this is good design for safety or efficiency. The government should be designing highways that speed up all the lanes as that is the best for society as a whole. How much more pollution is produced from the types of blockages backing up all lanes for miles due to idiotic design? How much time could people have for other uses? How much money is wasted with emergency services and on medical care that could have been saved with all the lanes available with breakdown lanes?

Through the whole Metroplex I see the same problems created in the HOT lanes or TX Express if you prefer. In many places the shoulders were eliminated to build the new lanes. The claim was no lanes would be taken away but that was a lie. Many breakdown lanes WERE taken away and have made traffic WORSE than if the breakdown lanes were left.

Resiliency is a popular word these days. In regards to roads, I call it competent design without barriers to slow traffic down and cause accidents. Breakdown lanes free the flow of traffic and without made up barriers you create resiliency.

I would also like to point out a very dangerous spot on US-75. In the left center lane the pavement is failing at the North seam on the overpass over Arapaho. There is already subsidence with the bridge already creating a bump. When you add the crumbling concrete it's a crash waiting to happen. At some point I expect to see a car airborne just like Roscoe from the Dukes of Hazzard.

Chip Pratt

I am opposed to charging for use of the lane. We are being tolled to death. Incentivizing the use of HOVs in the lane would be the preferred option at least in the interim. Removal of the bollards is a very good move and way overdue. A key for Richardson is access to the lane. There should be southbound access at least 2 places in Richardson, and northbound access just north of 75, and again south of 190 in time for drivers to exit to 190.

National Drive Electric Week (NDEW)

Katherine Homan

Will ERCOT be up to supplying electricity for all the electric cars that we are seeking to replace those running on gasoline?

Considering the new housing being constructed also needing power in these times of temperature extremes and now this new scope of demand for powering automotive vehicles, might our already inadequate Texas grid be headed for a Catch-22? Just wondering.

Response by NCTCOG Transportation Department:

Hi Katherine,

Apologies for a slow response, but you pose an excellent question. In short, the grid can indeed accommodate the additional load associated with electric vehicles (EVs). However, the key to success will be carefully managing *when* EVs charge to make sure we aren't adding the EV load during existing peak hours. This may be challenging, especially when fleets of large vehicles such as buses or delivery trucks electrify. However, if managed correctly, EVs can help create a more efficient, optimized grid, and be a power source during outages to help increase resiliency. The good news is that many organizations are highly aware of the challenge posed by integrating EVs with the grid, and much planning is being done now, before large-scale EV adoption. We've provided additional explanation below.

Examples of what is being done to plan: The Electric Reliability Council of Texas (ERCOT) Long-Term System Assessment Update and Input Assumptions for 2022 includes a transportation electrification scenario, where ERCOT has made some assumptions about future EV adoption to determine potential associated load. This information can be used by electricity generators to decide if and when to build new generating capacity. The Public Utility Commission has also collected information related to EV adoption over the past year to inform potential policy or regulatory actions. The Texas A&M Transportation Institute has simulated various electrification scenarios to evaluate grid impacts, and presented some of this work earlier this year (see the May video starting at the 54 minute, 45 second mark, if interested). In addition, our staff recently held a meeting on EVs with several utilities to get an understanding of what utility concerns and plans are and identify ways that we can facilitate shared learning and best practices. We hope to hold additional meetings in the near future and welcome you to attend if interested. (If interested, sign up for our Electric Vehicles North Texas email blasts.)

The grid can accommodate additional load, if added at the 'right' time: The grid has absorbed additional load associated with new technologies several times before - the widespread adoption of central air conditioning, the evolution of the internet, and now the transition to cloud computing have all been instances where additional electrical load was needed to support technology adoption. With EVs, the major factor is when electric vehicles are being charged and not just the power levels required to charge. Just as we try to avoid using large appliances during "peak" hours during the summer, the same behavior will need to be followed as EVs gain wide adoption. During the majority of the year, the grid continues to have excess generation capacity overnight that is underutilized – much of it renewable but intermittent wind energy (in fact, wind is still curtailed in Texas – meaning the amount of power generation is reduced to below what it could be - usually because there isn't enough market demand). This power could be used by EVs charging during those off-peak hours. Thus, charging EVs off-peak can actually benefit the grid by creating a market for the existing capacity that is currently held back, and also by smoothing out the peaks and valleys between high and low demand, providing a more stable load overall. Some retail electric providers offer incentives to their customers if the customer uses "smart charging" technologies that prevent the car from charging during peak hours.

EVs can serve as a power source during a power outage: During extreme events such as Winter Storm Uri, EVs have the potential to become a grid asset. Certain EVs have "bidirectional" capability, meaning they can send electricity from the car battery back to the grid if needed. There were instances in Houston of people <u>powering cell phones off a hybrid pickup truck</u>. Our staff has also met people who used their Mitsubishi plug-in hybrid SUV to keep their refrigerator running after a hail storm power outage. While this capability is still somewhat uncommon, it will offer substantial promise as more vehicles offer this feature.

NCTCOG does promote energy efficiency and energy management to reduce grid demand, and also promotes solar technology as a source of locally-generated, clean energy that can help provide additional grid resiliency. One of our major initiatives is also promotion adoption of the most recent building codes to ensure new construction is as efficient as possible. Oncor also offers incentives for efficiency-related projects through their www.takealoadofftexas.com program. Our staff is also preparing a workshop on the topic of energy resiliency to talk about a variety of items that can either reduce grid strain or provide options in the event of an outage. If you'd like more information, you may be interested in the websites below, and/or want to sign up for our energy/solar newsletter at Newsletters | Conserve North Texas.

HOV Pilot Project Along US 75 Corridor

Sue

I am very concerned about the changes from HOV to SOV on 75 between 635 & 121. There are trucks with trailers using HOV lanes and driving too slow and big trucks with materials for all the

developments being built north of 380. I would like to understand the reasoning as to why the HOV lanes may become SOV in that area.

Comments and Questions - Due Oct. 12, 2021 Regional Transportation Public Input upportunity

PUBLIC COMMENTS REPORT

WRITTEN COMMENTS SUBMITTED BY WEBSITE, EMAIL & SOCIAL MEDIA

<u>Purpose</u>

The public comments report is in accordance with the NCTCOG Transportation Department Public Participation Process, which became effective June 1, 1994, as approved by the Regional Transportation Council (RTC), the transportation policy board for the Metropolitan Planning Organization (MPO) and amended on November 8, 2018.

This report is a compilation of general public comments submitted by members of the public from Friday, August 20, through Sunday, September 19. Comments and questions are submitted for the record and can be submitted via Facebook, Twitter, fax, email and online.

This month, public comments were received on a number of topics across social media platforms and via email. Bicycle and pedestrian comments were in the majority.

In addition, comments were accepted through a new, online map tool. Users can drop a pin on a location in the region and leave a detailed comment. This month, there were 16 bicycle and pedestrian comments and six roadway comments. To read them, visit: http://nctcoggis.maps.arcgis.com/apps/CrowdsourceReporter/index.html?appid=b014e6d39b60

1. We're excited about all of the construction to connect Valleydale with the future site of the bridge over 75! We love the partnership with @CityOfDallas, @DallasCountyTx, @TxDOT, and @NCTCOGtrans to complete this project. – Northaven Trail (@NorthavenTrail)

2. Since our world changed last year, North Texans were looking for ways to stay active. Today we're featuring The Santa Fe Trail in Dallas. It stretches 5.3 miles and goes from Deep Ellum to White Rock Lake. Stay tuned for more! @CityOfDallas @BikeDFW @DallasParkRec @GreenDallas – NCTCOGTransportation (@NCTCOGtrans)

Wow - this is awesome. Please do more of these!

Are you allowed to ride e-bikes on the trail(s)? - Clayton Meeker (@Clm1403)

Hi, Clayton! Per state law, e-bikes are allowed on trails unless posted otherwise. – NCTCOGTransportation (@NCTCOGtrans)

Love it - now I just need to get one. :) - Clayton Meeker (@Clm1403)

3. Bridge girders up and more construction at the @NorthavenTrail bridge location. Thanks to @TxDOTDallas the project is currently a little ahead of schedule. – Jeff Kitner (@JeffKitner)

So exciting! – Rivae Campo (@Rivaebk)

4. We're "hot on the trail" for the quiet zone field study for the Cotton Belt/Silver Line - giving input on measures to keep pedestrians, cyclists & vehicles safe & retain as much quality of life as possible. @dartmedia @NCTCOGtrans #signals #walls #gates #fencing #nohorns #bells – caraathome (@) (@caraathome)

Can I ask why we need a train to the airport when Biden is going to put 50 percent of Americans on a no-fly list? Who's going to bw riding this train? – Mike OTL (@Mike_OntheLam)

If there is a betting pool, I'm in for the year 2070. \triangle – caraathome (@\) (@caraathome)

Lol. – Mike OTL (@Mike_OntheLam)

6. The A-Train Rail Trail is 19 miles long and is the longest trail in Denton County. The A-train Rail Trail is a product of @RideDCTA collaborating with community partners including @cityofdentontx, @CityofCorinth, @CityLakeDallas and @LewisvilleTexas. – NCTCOGTransportation (@NCTCOGtrans)

Trail of the Month: DCTA Rail Trail
The A-Train Rail Trail is a 19 mile-long trail located in
Denton County. Built parallel to the A-Train ...

Solution you will be a solution of the A-Train ...

Do you need a bike or a car once you get our of this train at all stations? – María Eugenia (@Ma E2021)

There are a plethora of mobility options once you get to our A-train stations. You can use your bike, try our new GoZone on-demand service, transfer to one of our Connect buses, etc. Hope this helps! – AH – DCTA (@RideDCTA)

Roadway

Email -

1. Jeorgia Brown

Hello!

I would like to request that there be a stoplight installed at the intersection of 287 and Prairie Ridge Blvd. Due to the new community being built in this area, traffic has increased in this area making it difficult and dangerous to enter, exit, or even pass through this area.

Thank you for your consideration.

1. Southern Montana counties are banding together to restore passenger rail service cut over 1/2 a century ago. Southern Montana. If they can do it why can't we expand rail service in Texas? @TXLegeCouncil @TXlege @bigskyrailmt @TXRailAdvocate @GovAbbott @DanPatrick @NCTCOGtrans – Peter J LeCody (@railadvo)

BigSkyRailMT @bigskyrailmt · Aug 27

With thanks to @NBCMontana for the mention. @bigskyrailmt Board members are meeting this weekend in Lewistown. 16 counties have joined the effort to return #passengerrail to southern Montana. #allaboardmontana ow.ly/VJGb50FZObH

We are watching Texas and @TXRailAdvocate with great interest! - BigSkyRailMT (@bigskyrailmt)

How about we collaborate to connect Texas and Montana bia passenger rail? We need north-south connectivity in this country. Reach out to @bigskyrailmt! -Dave Strohmaier (@davestrohmaier)

A monthly update on activities of the Regional Transportation Council and the North Central Texas Council of Governments Transportation Department

October 2021

CALENDAR

October 11, noon
Public Meeting
NCTCOG
Transportation Council Room
616 Six Flags Drive
Arlington, TX 76011

October 12, 5 pm Open House High-Speed Transportation Lone Star Park 1000 Lone Star Pkwy Grand Prairie, TX 75050

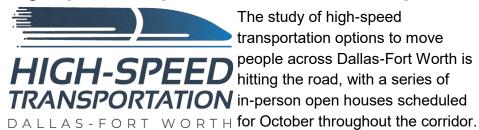

October 19, 4 pm Open House High-Speed Transportation Southside Preservation Hall 1519 Lipscomb Street Fort Worth, TX 76104

October 26, 4 pm Open House High-Speed Transportation Mercy Street 3801 Holystone Street Dallas, TX 75212

October 30, 10 am
Open House
High-Speed Transportation
Globe Life Field
734 Stadium Drive
Arlington, TX 76011

North Central Texas Council of Governments

High-speed transportation sessions to be in person

The open houses begin with a session October 12 from 5-8 pm at Lone Star Park in Grand Prairie. Open houses are also scheduled for October 19 from 4-7 pm at Southside Preservation Hall in Fort Worth, October 26 from 4-7 pm at Mercy Street in West Dallas and October 30 from 10 am to 2 pm at Globe Life Field in Arlington. Large venues have been chosen to allow for adequate social distancing.

There will be a short video on a loop discussing the project and presentation boards throughout each venue that will explain the different high-speed technologies and recommended route. The sessions are intended to promote interaction between residents and the project team while providing an overview of the Phase 1 recommendations. Planners have recommended a route along the Interstate Highway 30 corridor and two potential technologies for further study – high-speed rail and hyperloop technologies.

The technology selected will connect residents to the region's existing transportation system, as well as the planned high-speed rail line under development between Dallas and Houston and a future line between Fort Worth and South Texas.

Each open house location will offer free parking nearby. Comments will be accepted in person and online at www.nctcog.org/dfw-hstcs. The location of each of the venues is also available on the webpage.

REGIONALNews

NCTCOG evaluating options for US 75 corridor

An interim plan to improve reliability along a stretch of US 75 was recently presented to the Regional Transportation Council. NCTCOG has been working on a plan for the underutilized high-occupancy vehicle lane in the corridor, and the pilot project aims to create a technology lane that would evaluate the effectiveness of allowing single-occupant vehicles to utilize the HOV lanes (no toll, no HOV requirement) while providing an incentive to HOVs. Planners propose to incentivize carpooling using the GoCarma app currently used to obtain HOV discounts on the region's TEXpress Lanes. The technology lane could have several benefits, including improved safety and response time, reduced congestion, better air quality and enhanced traffic flow on frontage roads (with improved signal timing). The remaining pylons separating the HOV lane from general-purpose lanes would also be removed, leading to a safer roadway. The pilot project aims to increase the corridor's capacity to make the fast-growing corridor more efficient for commuters, residents and businesses. The project would cost a total of \$53.8 million, with \$10 million funded through a grant with the Texas Department of Transportation to develop the technology lane aspect. The technology lane could be open to traffic in the summer of 2024.

Trinity Metro introduces 'A Better Connection' for customers

Trinity Metro rolled out its newly redesigned bus system with more frequency, extended hours and better customer options in September. Known as A Better Connection (ABC), the redesign will offer customers more direct routes that reach their destination without having to go through downtown.

Last month, Dallas Area Rapid Transit announced a similar redesign of its bus network, which will debut in January.

The Trinity Metro plan has been in development for approximately a year, as Trinity Metro has analyzed its routes and gathered public input

Trinity Metro has rolled out a redesigned bus service offering greater frequency and expanded service to customers.

from residents regarding their transportation needs, said Wayne Gensler, vice president and chief operating officer for bus and paratransit.

"These changes will provide more service options and easier access for our customers – and all without any increase to our operating budget," Gensler said.

Throughout the planning process, Trinity Metro invited the public to provide feedback on transit options. The scenario that generated the most interest was a "walk more, wait less" option that would provide more frequent service to more customers. ABC will offer seven routes with service to neighborhoods that did not have service. These routes mean new access for 27,400 people in 8,500 households. They will be within a quarter-mile of a bus route as will 3,600 jobs. Additionally, 17 schools will have access within a quarter-mile.

LONG-RANGE PLAN

Planners working on update to Mobility 2045

NCTCOG is developing an update to Mobility 2045, the Metropolitan Transportation Plan for the fast-growing Dallas-Fort Worth area.

While maintaining the same horizon year of 2045, the plan update will incorporate the latest demographic and revenue forecasts for 2045 and refined project recommendations. Planners continue to seek input from the public through a variety of methods, including public input opportunities and meetings (see page 4) and the online Map Your Experience tool. This webpage, allows users of the transportation system to provide input directly to NCTCOG on where they are experiencing transportation trouble, regardless of how they choose to get around.

Users can record their issues by placing pins on a map. These pins will be compared with currently planned recommendations to see where NCTCOG is already working on solutions, and where new ones are needed. The Mobility 2045 Update is expected to be approved by the Regional Transportation Council in 2022. The public can keep up with the progress of the Mobility 2045 update at www.nctcog.org/PlaninProgress.

For information on the current plan, visit www.nctcog.org/mobility2045.

REGIONALNews

October is Fall Car Care Month

Are you car care aware? October is Fall Car Care Month and that means taking a few extra steps to make sure your vehicle is operating well.

This may not only prolong the life of your car but save you time and keep you and your passengers safe. Make sure your coolant levels are topped off with antifreeze to prevent your car from overheating and leaving you stranded.

NCTCOG will be present at in-person events in Denton and Burleson this month to discuss with residents the importance of proper car maintenance. Additional outreach is planned for the spring.

In the meantime, there are ways to ensure you get the

Ensuring your car maintains proper tire pressure is an important part of maintaining your car and improving its performance.

most out of your vehicle while being mindful of air quality. For example, keeping your check engine light off ensures your car is not polluting more than necessary, which means better air quality for all of us in the region.

Winter months bring potential driving hazards, such as icy roads, so it is important to prepare by checking your brakes and tires in the fall as the weather cools down.

Worn treads on a tire can seriously impact a car's ability to stop in the rain. If your tread depth is less than 4/32 inches, you should consider replacing the tires.

Also, if you hear squeaking brakes, that is your vehicle's way of telling you that there may be an issue that needs attention.

Stay safe and remember to be Car Care Aware! For more information, visit www.ntxcarcare.org.

PUBLIC *Involvement*

NCTCOG to host in-person public meeting Oct. 11

NCTCOG will host a public meeting in October to provide an overview of the Metropolitan Transportation Plan and present details on the freight safety campaign and local government energy reporting.

The meeting will take place at NCTCOG's Arlington offices, 616 Six Flags Drive, at noon on Monday, October 11 and marks the first inperson public meeting since March 2020, due to the on-going COVID-19 pandemic. Residents may attend the meeting or watch the live stream. All attendees are encouraged to wear masks and practice social distancing. One of the primary responsibilities of a metropolitan planning organization is the development and maintenance of a Metropolitan Transportation Plan. The MTP identifies transportation needs, investments and priorities for the regional transportation system. NCTCOG is developing an update to the current MTP, Mobility 2045, and will provide an overview of the project timeline.

Additionally, staff will give details on the freight safety campaign, which is educating heavy-duty vehicle operators about following regional truck lane restrictions, and informing the public about safe driving practices near large commercial vehicles.

Staff will also present an overview of the local government energy reporting requirements, NCTCOG resources and training, and reminders regarding the upcoming 2021 Local Government Energy Reports. Political subdivisions in ozone nonattainment or "affected" counties in Texas are required to reduce their electric consumption by five percent each year and report their annual electricity consumption to the State Energy Conservation Office.

The department's interactive map tool, Map Your Experience, the Regional Smoking Vehicle Program, vehicle incentive opportunities and administrative revisions for Mobility 2045 will also be highlighted. To watch the meeting online, click the "live" tab at www.nctcog.org/video. A recording of the presentations will also be posted at www.nctcog.org/video. A recording of the presentations will also be posted at www.nctcog.org/input, where residents can comment through November 9. For special accommodations, or to request printed copies of information discussed or a free roundtrip ride between NCTCOG and the Trinity Railway Express CentrePort/DFW Airport Station, contact Carli Baylor at 817-608-2365.

NORTHBOUND I-35 IMPROVEMENT PROJECT AT US 380 "RAMPS" UP

The project will reverse the northbound 1-35 entrance and exit ramps

DENTON COUNTY - Construction began last month on a safety improvement project on northbound I-35 at US 380 in Denton County. The project will reverse the northbound entrance and exit ramps and add lane capacity at the northbound I-35 frontage road and US 380 intersection to address increased traffic in the area.

The current entrance ramp

north of Oak Street will be reconstructed to serve as the exit ramp. The current exit ramp to US 380 will be reconstructed as an entrance ramp. Reversing the ramps will increase safety and mobility by eliminating queueing on the mainlanes from exiting traffic. It will also reduce merging and weaving on the I-35 frontage road. The \$1.8 million project is expected to wrap up by early 2022, weather permitting.

The project is an interim safety improvement before a

larger I-35 widening project is expected to begin construction in 2023. Eventually the I-35 entrance and exit ramps at US 380 will be braided, where one ramp crosses the other.

TxDOT is encouraging drivers

to remain aware in the work zone while these much-needed improvements are being made. Work zones present a different and sometimes challenging environment for drivers to

SOUTHERN GATEWAY

TXDOT PROJECT TRACKER

Connecting You With Texas

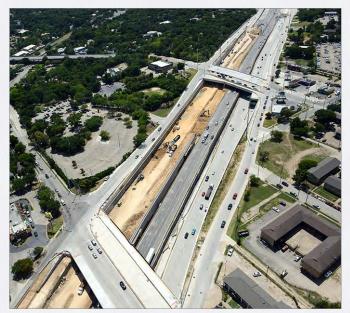

DALLAS DISTRIC

OVERVIEW: The Southern Gateway project will add capacity, replace aging pavement and improve safety along I-35E and US Highway 67 in southern Dallas. As one of the major highways into and out of downtown Dallas, the roadway carries about 218,000 vehicles per day on pavement that was first built in the 1950s. The reconstruction project has been supported since before 2003, when the project was first environmentally cleared but left unfunded. With improvements complete just to the north with the Horseshoe Project, the next step to further improve congestion in downtown is to rebuild this major urban highway.

Goals: Improve safety by rebuilding the highway, which will improve entrance and exit ramps, improve cross street bridges and add full shoulders within the right of way along the I-35E section.

Full reconstruction and widening of I-35E to include five general purpose lanes in each direction and two reversible non-tolled express lanes from Colorado Boulevard to US 67. I-35E will have seven lanes into downtown each morning and seven lanes out of downtown each evening. The US 67 scope will save the existing paving and widen to provide a third general purpose lane in each direction from I-35E to I-20.

The existing concurrent US 67 HOV lane will be reconstructed to be one reversible non-tolled managed express lane in the center median.

TxDOT photo

Newly constructed I-35E mainlanes and bridges at Ewing and Marsalis partially open to traffic.

PROJECT HISTORY

- Public Meetings June 23 & 25, 2015; July 7 & 9, 2015, January 26 & 28, 2016
- FHWA Schematic Approval Spring 2016
- Public Hearing July 2016
- FHWA Environmental Clearance Dec. 2016
- **Design-Build Contract** Executed with Pegasus Link Constructors (PLC) June 2017

PROJECT PROGRESS

- Traffic switches completed to open portions of the new pavement for new ramps along southbound and northbound I-35E
- Work continues for the Marsalis, Illinois, Louisiana, Ewing and 12th St bridges over I-35E
- Continued progress on earthwork, drainage, concrete pavement, retaining walls and bridge construction in multiple areas of the project

PROJECT DETAILS

 Limits: I-35E from Colorado Blvd. to south of Kiest Blvd.; on US 67 from I-35E/US 67 split to I-20.

- Length: 11 miles
- **Estimated Completion:** Summer 2022

PROJECT DESCRIPTION

- I-35E: Full reconstruction and widening to include five general purpose lanes in each direction and two reversible, non-tolled managed express lanes from Colorado Blvd. to US 67 and infrastructure for a deck plaza.
- US 67: Add a third general purpose lane in each direction from I-35E to I-20. The existing concurrent US 67 HOV lane will be rebuilt to become one reversible, nontolled managed express lane in the center median.

ESTIMATED COSTS						
Construction	\$530.3 M					
Utilities	\$16.3 M					
Design/QA/CM	\$79 M

635 EAST PROJECT

TXDOT PROJECT TRACKER

| Connecting You With Texas

OVERVIEW:

The 11-mile 635 East Project will reconstruct and widen I-635 from US 75 to I-30, including the I-635/I-30 interchange. The general-purpose lanes will be expanded and the existing tolled managed lanes will be rebuilt. When complete, there will be a total of 10 general purpose lanes and two tolled managed lanes. The project will also include the construction of continuous frontage roads and provide numerous intersection improvements.

I-635 East originally opened in 1969 and was designed to accommodate 180,000 cars per day. Recently, the average daily traffic on I-635 reached 230,000. This increase has contributed to the roadway's top 30 ranking on Texas' most congested roadways list. The Texas Transportation Commission has designated the 635 East Project as part of the statewide Texas Clear Lanes initiative, organized to address the most congested roadways in the state's metropolitan areas. The project is designed to relieve congestion, provide local connectivity and improve safety.

Here's an aerial view of the I-635/I-30 interchange, looking northeast along I-30.

PROJECT HISTORY

- Public Meeting April 19, 2016
- FHWA Schematic Approval May 1, 2014 (Skillman/Audelia interchange), July 21, 2017 (I-635 East Schematic)
- **Public Hearing** Jan. 31, 2017
- FHWA Environmental Clearance Jan. 20, 2003 (original FONSI), June 23, 2015 (Skillman/ Audelia interchange) and April 24, 2017 (revised schematic)
- · Design-Build Contract
 - May 30, 2019 Conditional Award
 - Aug. 22, 2019 Contract Execution
 - Sept. 9, 2019 Notice to Proceed 1 (NTP1)
 - Jan. 24, 2020 Notice to Proceed 2 (NTP2)

PROJECT PROGRESS

- Fall 2021 Frontage road and ramp shifts at Royal Lane, Jupiter Road and Plano Road
- Fall 2021 Continue I-30 mainlane construction between Gus Thomasson Road and Northwest Drive
- Fall 2021 Ongoing project-wide utility work and drainage construction

Work Scheduled for Late 2021 Includes:

- Ongoing bridge construction at various cross streets along I-635 including Forest Lane, Abrams Road, Walnut Hill Lane/Kinglsey Road, Jupiter Road, Northwest Highway, Centerville Road/Ferguson Road and La Prada Drive
- Pavement construction at Skillman Street along I-635 and continued temporary bridge construction on the west side of Skillman Streett
- Continue direct connector ramp construction at the I-30/I-635 interchange

PROJECT DETAILS

- · Limits:
 - I-635 from east of US 75 to I-30
 - I-30/I-635 interchange
- Length: 11 miles
- **Cost:** \$1.7 billion (Design and Construction)
- **Funding:** Funding sources include CAT 2, 3, 5, 7, 11 and 12
- Right Of Way: Acquisition is 100% complete
- Project:

- Reconstruct the GPLs and construct one additional lane in each direction
- Construct continuous FRs consisting of two or three lanes in each direction
- Reconstruct the I-635/I-30 interchange
- Reconstruct the existing single tolled managed lane in each direction between US 75 and I-30
- Reconstruct the Skillman St. bridge

TEXAS CLEAR LANES

The Texas Transportation Commission has designated the 635 East Project as part of the statewide Texas Clear Lanes initiative, which addresses the most congested areas in the state.

PROJECT SCHEDULE

- Spring 2020 Construction start
- Late 2024 Substantial Completion

NOTE: Highlighted areas are not drawn to scale.
