

Air Quality Update

Air North Texas Coalition

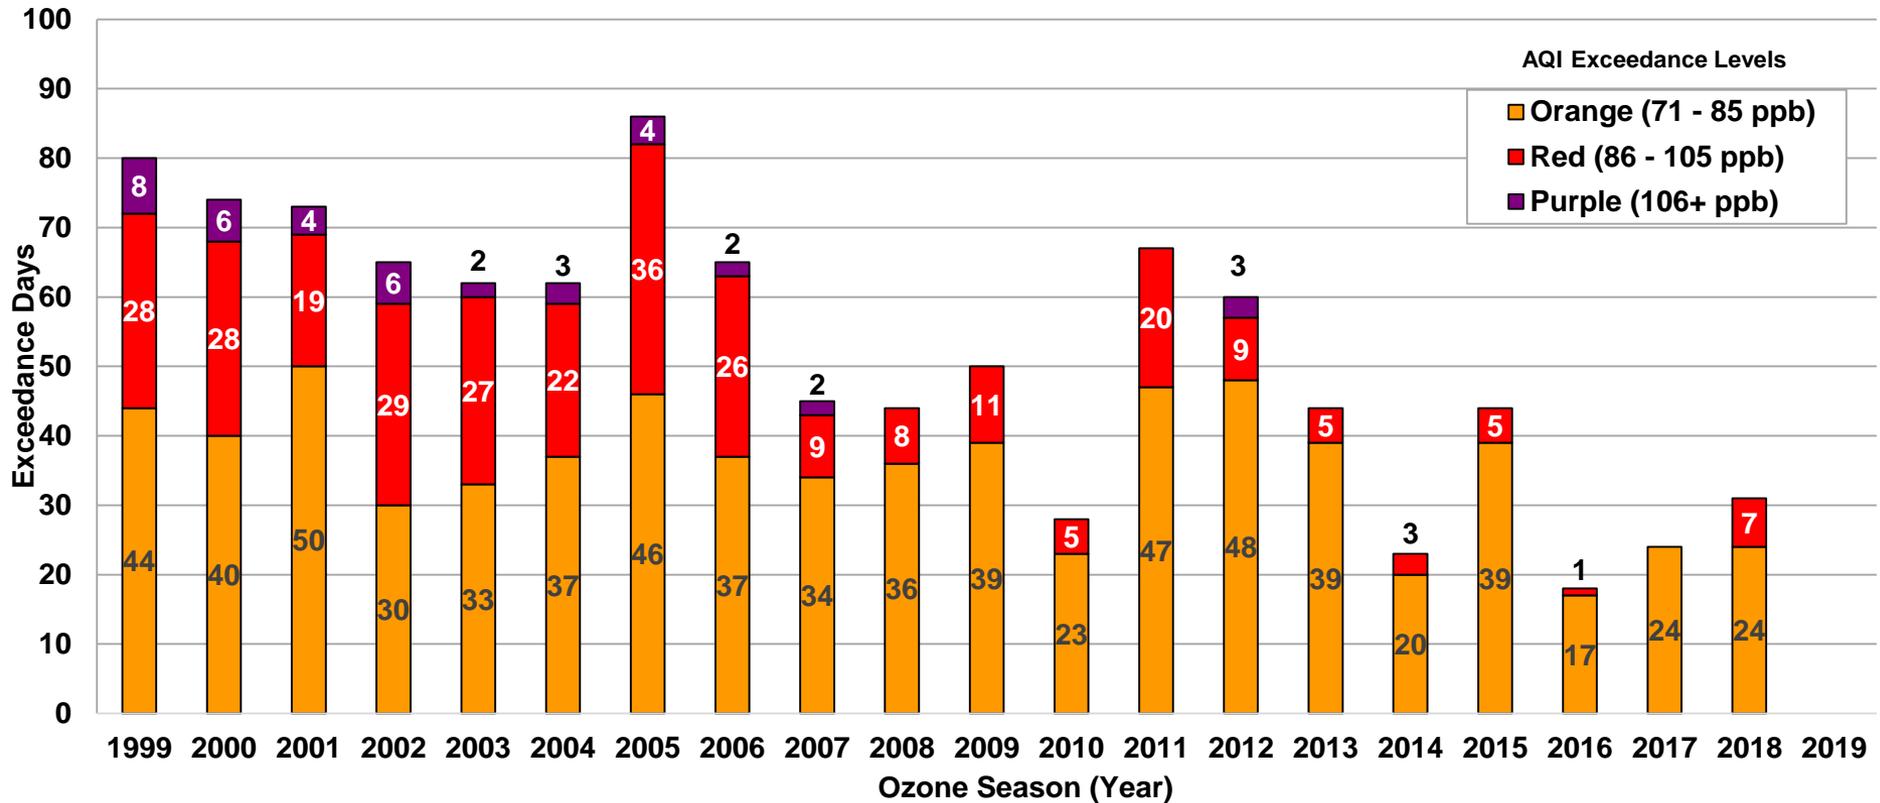

March 21, 2019

North Central Texas
Council of Governments

8-HOUR OZONE NAAQS HISTORICAL TRENDS

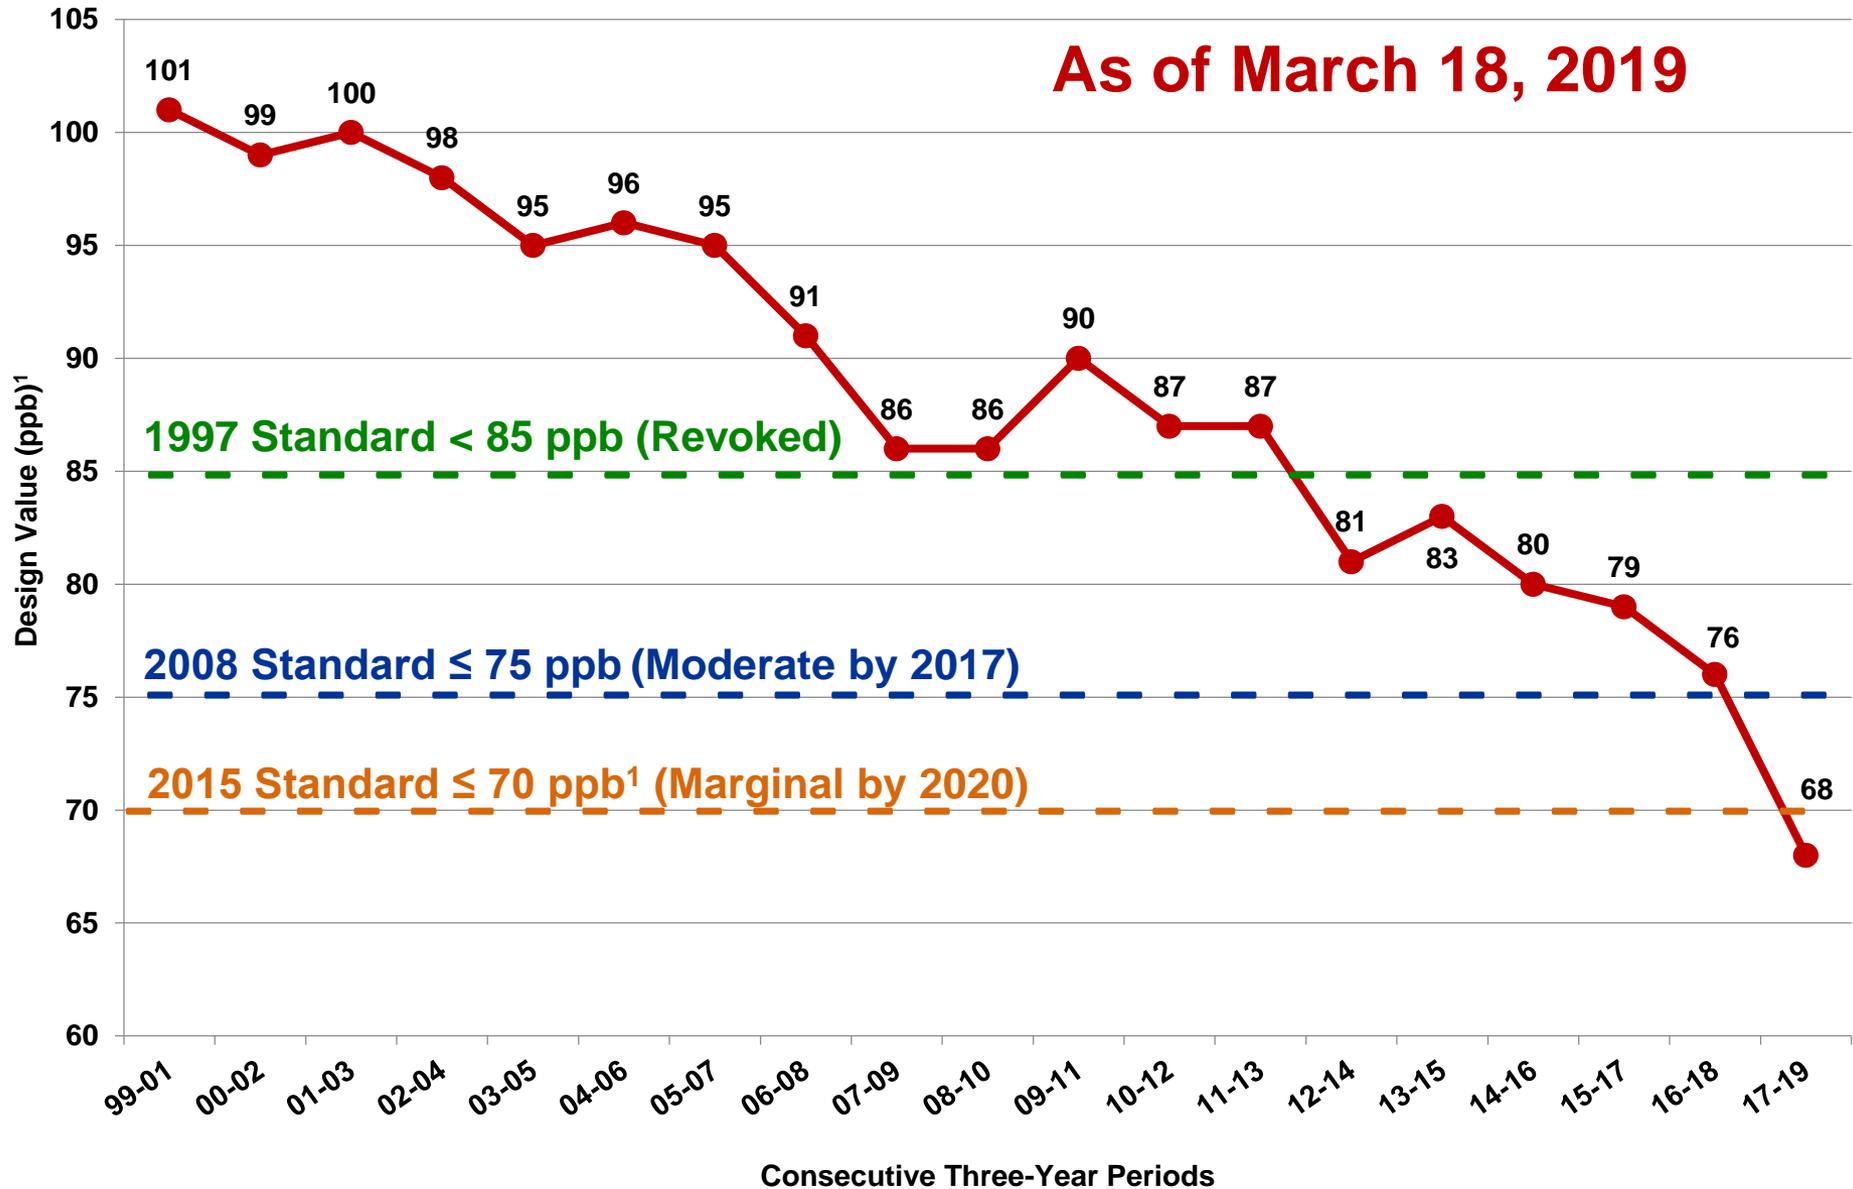

Based on ≤ 70 ppb (As of March 18, 2019)

Exceedance Level indicates daily maximum eight-hour average ozone concentration.
Exceedance Levels are based on Air Quality Index (AQI) thresholds established by the EPA for the revised ozone standard of 70 ppb.

Source: TCEQ, http://www.tceq.state.tx.us/cgi-bin/compliance/monops/8hr_monthly.pl
ppb = parts per billion

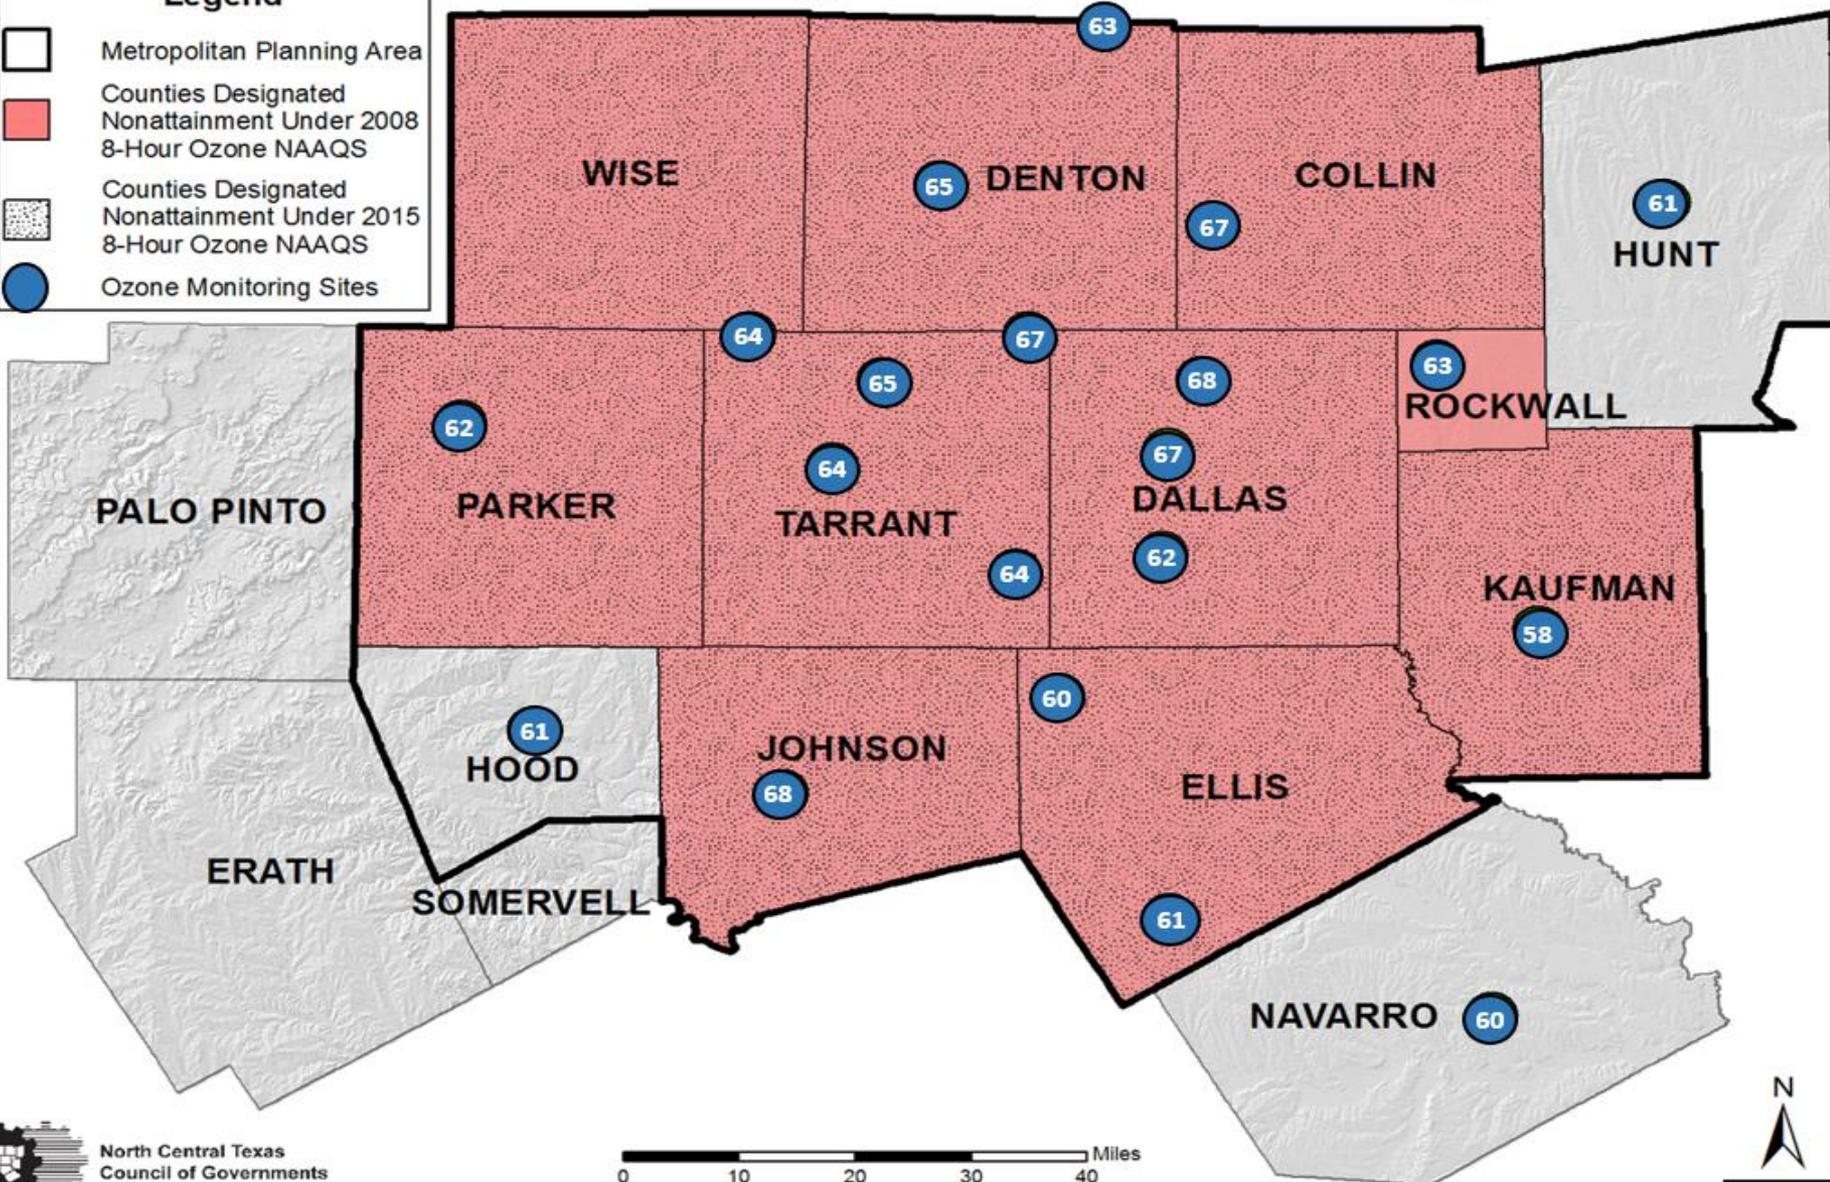

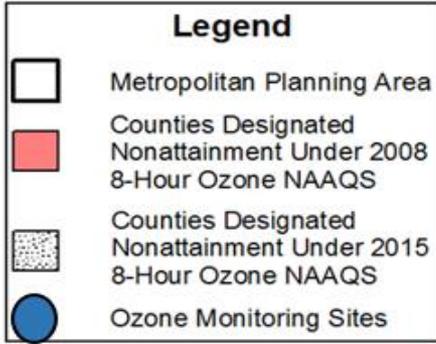

8-HOUR OZONE NAAQS HISTORICAL TRENDS

¹Attainment Goal - According to the US EPA National Ambient Air Quality Standards, attainment is reached when, at each monitor, the *Design Value* (three-year average of the annual fourth-highest daily maximum eight-hour average ozone concentration) is equal to or less than 70 parts per billion (ppb).

Riding on low tires is a lot of work! It increases drag, taking more energy for the vehicle to move, thus burning more fuel and causing more air pollution. Remember to check your tire pressure during these winter months. #AirNTX

Go green and breathe clean with Air North Texas

Posted March 1, 2019

Arlo the "Airmadillo"

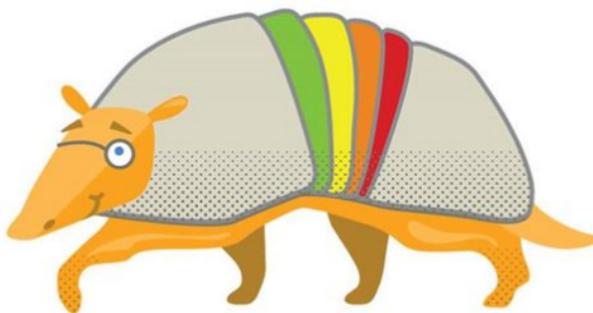

Arlo is the mascot of Air North Texas. He's not a typical armadillo; he's an airmadillo. His shell changes color based on the Air Quality Index.

Air pollution season officially begins in March in North Texas and runs through November.

This year, take action by checking out Air North Texas, a regional public awareness campaign that educates and encourages residents to make clean air choices. Follow real-time air quality monitoring data, sign up for air pollution action day alerts, investigate commuting alternatives and learn clean air strategies for home, school or work.

A 10-county region in North Texas is in nonattainment for ozone levels. Ozone can reach unhealthy levels on hot sunny days in urban environments. Motor vehicle exhaust, gasoline vapors, emissions from industrial facilities and electric utilities, and chemical solvents contribute to ozone pollution. Even relatively low levels of ozone can have negative health effects.

On June 21, celebrate Clean Air Action Day by doing at least one thing to help improve air quality. View a list of actions you can take on June 21.

AirCheckTexas

Repair and Replacement Program Update

Program Background

AirCheckTexas Established in 2002 (77th Legislature)

Helps Low-Middle Income Residents Repair or Replace Vehicles That Fail an Inspection or Are 10 Years Old and Older

Available to Residents in 9 Participating Counties

Funded by \$6 Fee Collected on All 1996 & Newer Vehicle Registrations*

Assistance Provided Through Vouchers Up to \$600 for Repairs, Up to \$3,500 for Replacements

Program Accomplishments

AirCheckTexas Began in November 2002

Since Program Inception:

Applications Processed: 137,633

Vehicles Repaired: 35,084

Vehicles Retired and Replaced: 36,908

Total Financial Assistance: \$121 Million

Significant Emission Reduction Benefits: 117 tons/years Nitrogen Oxide

Current situation

Fiscal Year 2018-2019 Funding Vetoed by Governor Abbott in June 2017 (85th Legislative Session)

Maintained Operations From Carryover of Previous Appropriations (84th Legislative Session)

Carryover Funding Expires End of Fiscal Year 2019

Therefore:

April 8, 2019 = Last Day Applications Will Be Accepted

AirCheckTexas Website

Income Guidelines and Application Links

Number of people in household	Annual household income* requirements (at or below)	
1	\$37,470	Income Guidelines
2	\$50,730	New Vehicle Requirements
3	\$63,990	Retired Vehicle Requirements
4	\$77,250	Replacement FAQs
5	\$90,510	Online English/Spanish App
6	\$103,770	English Application
7	\$117,030	Spanish Application
8	\$130,290	
Over 8	Add \$13,260 for each additional person	Vietnamese Application

Vehicle requirements

- Currently registered and has been for 12 of the past 15 months in a participating North Texas county prior to the application date,
- Passed a DPS vehicle safety inspection (if vehicle is 25 years old or older)

OR

- Passed a safety and emissions inspection (if vehicle is 2 - 24 years old) within 15 months of the application date,
- Vehicle must be drivable and gasoline powered,

AND EITHER

- Failed an emissions test within the past 30 days of the application date (for vehicles less than 10 years old),

OR

- Vehicle must be 10 years old or older. (Determined from the current calendar year: i.e. 2019 minus 10 equals 2009 model year)

Program Status

The AirCheckTexas Program Will End June 28, 2019.

Efforts Underway to Reinstate Previously Collected Funds,
Approximately \$71 Million Dollars.
