# Town of Little Elm GIS Dashboards

Dashboards And What They Can Offer Your Organization...

November 21, 2023

This dashboard allows for the Town Engineering Department to view where inspectors have annotated issues during field inspections

What Feeds it?

The data that feeds this application is coming from a hosted feature layer from which results are generated through Survey 123.

# **Engineering Survey**

ArcGIS Survey123 is a complete, form-centric solution for creating, sharing and analyzing...

# Water Distribution Dashboard

# What is it?

This dashboard allows for Public Works Management to view where existing water infrastructure is located.

# What Feeds it?

Data for this map is fed from a service that is referencing our enterprise geodatabase, which allows for instantaneous updates. Data is also collected from the field using GPS equipment.

# What is it?

This Dashboard allows for both internal staff and external residents the ability to view our parks and trails system, and all the existing amenities.

- We currently have 2 dashboards stood up across Portal and AGO.
- The public-facing AGO dashboard utilizes the newest update from ESRI, allowing for a single dashboard with a desktop and mobile view.

Boat Ramp

Drinking Fountain

# Navigating to a Park

-The park navigator located at the bottom of the map will allow the user to pan over to a specific park, by simply clicking anywhere in the box where the park name is, you will be transported to the park of choice.

# Selecting Amenitites

-The Amenitites Search is located in the upper left corner. If you would like to see what amenities are within a specific park, click directly on the amenity name and a symbol will appear on the map with the location of the amenity. The search Filter is also available for quick searching of amenities. The quickest way to show all amenities is by clicking on the select all feature, and then navigating to a specific map.
