

**ROADWAY ELIGIBILITY
BASED ON FUNCTIONAL CLASSIFICATION**

Functional Classification Eligibility	
Interstates	Eligible
Principal Arterial: Other Freeways & Expressways	Eligible
Principal Arterial: Other	Eligible
Minor Arterial	Eligible
Major Collector	Eligible
Minor Collector	Not Eligible
Local Roads	Not Eligible

Definitions:

Interstates: Part of the Interstate Highway System. Fully access controlled. Provides maximum mobility.

Principal Arterial – Other Freeways & Expressways: Not part of the Interstate Highway System Fully access controlled. Provides maximum mobility.

Principal Arterial – Other: Roadways that limit access to prioritize mobility. Carry large volumes of traffic for longer distances. Serve intra-urban traffic, as well as through traffic. Connect most small urban areas and carries through-county traffic in rural settings.

Minor Arterial: Allow greater access to serve mostly intra-urban traffic. Connect small urban areas in rural settings with greater capacity than major collectors.

Major Collector: Serve the combined purposes of vehicular movement and access to adjacent property. Provide circulation to residential, commercial, and industrial areas. Connect small urban areas in rural settings.

Minor Collectors: Collect traffic from local roadways. More integrated into neighborhoods than major collectors.

Local Roads: All other roadways not listed in the previous functional classifications. Through traffic discouraged.

To determine a roadway’s functional classification, use the Texas Department of Transportation’s Statewide Planning Map:

https://www.txdot.gov/apps/statewide_mapping/statewideplanningmap.html

- Once the webpage is opened, turn on the “Functional Classification and Urban Areas” overlay from the menu on the left side.
- Navigate to the facility of interest. If it is lit up in a color, it is on the Federal Functional Classification System (FFCS). Clicking on a road segment will cause a pop-up box to appear with additional information for that segment. Toggle the arrows on the pop-up box to the Functional Classification section and it will provide details on the roadway’s classification.
