

North Central Texas Council of Governments

TO: Interested Parties

DATE: August 18, 2023

FROM: Dan Kessler
Assistant Director of Transportation

SUBJECT: Request for Information – Crash Reconstruction Technology and Training Program

The North Central Texas Council of Governments (NCTCOG) is requesting information from a consultant or firm on developing a Regional Crash Reconstruction Technology and Training Program in the NCTCOG area. Fifty percent of traffic delays in major metropolitan areas are due to incidents and crashes on the roadway, according to the Federal Highway Administration. The time spent dealing with roadway incidents not only ties up traffic; it puts first responders in harm's way. Technology is available that can alleviate congestion and reduce secondary collisions caused by traffic crashes. Crash Reconstruction technology assists with clearing roadway incidents more quickly after traffic crashes by allowing police responders to capture crash scene information while on the roadway via crash reconstruction technology; however, it gives them the ability to analyze the crash and conduct their investigation from the safety of their office. NCTCOG is investigating currently available technology.

This is an invitation to respond to the Request for Information (RFI). Responses must be received no later than 5:00 p.m., Central Time, on **Friday, September 15, 2023**, to Camille Fountain, Senior Transportation Planner. Responses submitted after that time may not be considered and may be returned to the proposer unopened. The Request for Information will be available at www.nctcog.org/rfp by the close of business on Friday, August 18, 2023.

Any amendments or updates to the RFI, as well as all questions and responses, will be posted on NCTCOG's website. Written questions concerning the RFI should be submitted by email to TransRFPs@nctcog.org by **5:00 p.m. on Friday, August 25, 2023**. We appreciate your consideration of this request.
