She explained that NCTCOG has actively promoted the standardization of model construction codes and uniformity of codes in the region for 50 years and that these codes are brought every three years for review. This effort has made it easier for contractors, builders, and developers to do work from city to city throughout the region, thereby reducing overall construction costs.

The Regional Codes Coordinating Committee (RCCC), through its respective code advisory boards, has reviewed, developed regional amendments for and approved the 2021 editions of the following codes:

- International Building Code
- International Residential Code
- International Swimming Pool and Spa Code
- International Fire Code
- International Plumbing Code
- International Mechanical Code
- International Fuel Gas Code

Ms. Marvin made mention that the previously included International Existing Building code was removed from the resolution. She explained that it was not part of the review process and that it was incorporated into the International Building Code, not a standalone item.
