Protecting our water for years to come

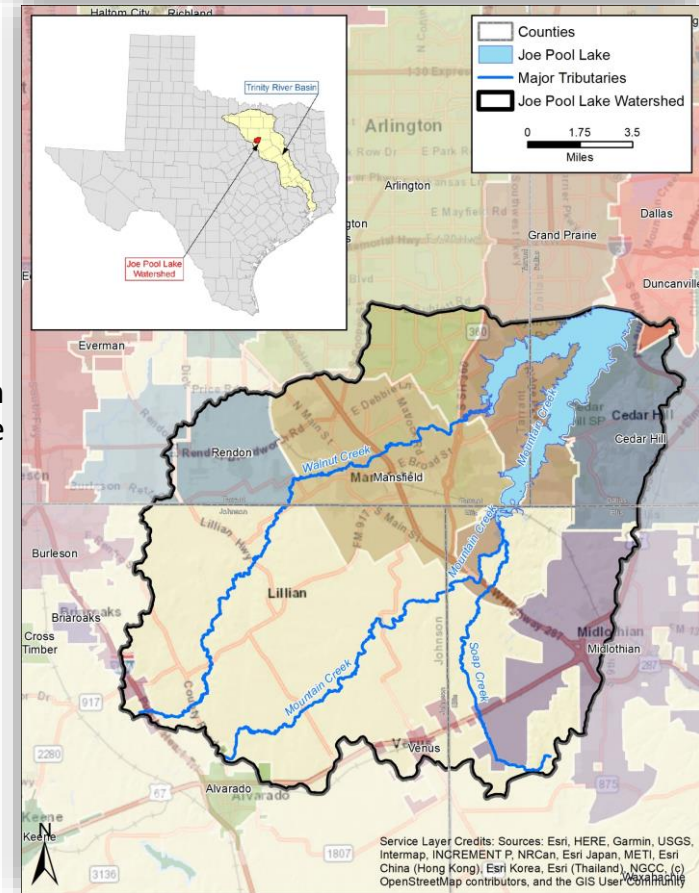

Join the Joe Pool Lake Watershed Protection Partnership

The Trinity River Authority, the Texas Commission on Environmental Quality, and the Cities of Cedar Hill, Grand Prairie, Mansfield, and Midlothian are partnering with local residents, businesses, and organizations to develop a non-regulatory watershed protection plan.

We will discuss the impacts of bacterial contamination in the watershed from several sources, and you will be able to influence the selection of best management practices (BMPs) for each of the following:

- Cattle
- Horses
- Sheep/Goats
- Deer
- Feral Hogs
- Dogs/Cats
- Septic Systems
- Sanitary Sewer Overflows

If you live, work, or play in this watershed, we invite you to be a part of the development process by learning about available management options and providing input on the ones that should be implemented as part of the plan, which will include voluntary protection measures for recreation and drinking water uses in Joe Pool Lake Watershed.

JOE POOL LAKE
WATERSHED PROTECTION
