**Note:** Please advise us if any of the above information is incorrect.

The following items must be received at the letterhead address no later than April 18, 2014.

**Activity 230 - Community Program Data:**
1. Complete as much of page CC-213-2 as possible. At a minimum, lines 6 and 13 and the 16th line, "Period Covered," are required to be completed. The instructions to fill out the form are on pages CC-213-3 and CC-213-4 (See Appendix E).
2. Provide a parcel map of the community with a floodplain overlay and include a legend.

**Activity 310 - Elevation Certificates:**
1. Please send a list/report of permits issued by address for only finished new buildings built or substantially improved in the Special Flood Hazard Area (SFHA) since the last cycle visit (March 11, 2009). Please include the source and date range of the list.
2. Omit from the list permits for structures not in the SFHA (verify Item 88 with 2 zones.)
Preparing for your CRS Verification Visit

Guidance from the ISO Specialist for your visit

Meeting notice letter with list of documentation (Crosswalk)

- Use as checklist for required documents
- Some documents are required 60 days prior to the date of the verification visit:
  1. Permit List
  2. Elevation Certificates
  3. Conveyance system feature map and inventory

Possible pre-visit conference call (highly recommended)
Example of Activity 320 in the List of Documentation

Activity 320 - Map Information Services:

• Please provide the outreach project that shows publicity is being sent annually for this activity. The publicity requirement can be accomplished using any of the options listed in the CRS Coordinator’s manual. Publicity must describe in a few words all the services being credited (MI1 thru MI7).

• Also please provide documentation showing that you are providing basic information found on the FIRM which is required for MI1 credit. For additional MI credit, provide documentation examples (maps, aerial photos, excel spreadsheets, etc.) for other elements of this activity.

• Provide records or a log from the past year documenting the map information service is being implemented.

NOTE: If all of the map information comes from the same FIRM, the community number is not logged. The community in this example has only one FIRM based upon NAVD, so the FIRM date and datum are not included in the log. Also, the panel number logged includes the suffix. The community has all of the data needed to document MI 1, MI 2, MI 4, MI 6, and MI 7 in this log.

Figure 320-1 A sample log for a map information service.  (Page 320-5)

Example of required publicity

If you want to know if a property is in the Special Flood Hazard Area, check our website at www.fema.org/flood/mapinfo. You'll find a wealth of information about the City's Flood Insurance Rate Map, coastal high hazard areas, flood depths at your property, natural conservation areas and wetlands, flood insurance, special rules for building in the floodplain, and ideas for protecting your property from flood damage. Or you can call the Building Department with all of your floodplain questions at 555/123-4567. We also have copies of FEMA Elevation Certificates on all buildings constructed or substantially improved in the floodplain since January 1995.
Preparing for your CRS Verification Visit

About the Mandatory Purchase of Flood Insurance

The NFIP: The National Flood Insurance Program (NFIP) is a federal program enabling property owners in participating communities to purchase flood insurance on eligible buildings and contents, whether they are in or out of a floodplain. This community participates in the NFIP, making federally backed flood insurance available to its property owners.

The NFIP insures most walled and roofed buildings that are principally above ground on a permanent foundation, including mobile homes, and buildings in the course of construction. Property owners can purchase building and contents coverage from any local property and casualty insurance agent. To find a local insurance agent that writes flood insurance in your area visit www.floodsmart.gov.

Mandatory Purchase Requirement: Pursuant to the Flood Disaster Protection Act of 1973 and the National Flood Insurance Reform Act of 1994, the purchase of flood insurance is mandatory for all federal or federally related financial assistance for the acquisition and/or construction of buildings in Special Flood Hazard Areas (SFHAs). An SFHA is defined as any A or V flood zone on a Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM).

The mandatory purchase requirement also applies to secured loans from such financial institutions as commercial lenders, savings and loan associations, savings banks, and credit unions that are regulated, supervised, or insured by federal agencies, such as the Federal Reserve, the Federal Deposit Insurance Corporation, the Comptroller of Currency, the Farm Credit Administration, the Office of Thrift Supervision, and the National Credit Union Administration. It further applies to all loans purchased by Fannie Mae or Freddie Mac in the secondary mortgage market.

Federal financial assistance programs affected by the laws include loans and grants from agencies such as the Department of Veterans Affairs, Farmers Home Administration, Federal Housing Administration, Small Business Administration, and FEMA disaster assistance.

How it Works: When making, increasing, renewing, or extending any type of federally backed loan, lenders are required to conduct a flood zone determination using the most current FEMA FIRM to determine if any part of the building is located in an SFHA. If the building is in an SFHA, the federal agency or lender is required by law to provide written notification to the borrower that flood insurance is mandatory as a condition of the loan. Even though a portion of real property on which a building is located may lie within an SFHA, the purchase and notification requirements do not apply unless the building itself, or some part of the building, is in the SFHA. However, lenders, on their own initiative, may require the purchase of flood insurance even if a building is located outside an SFHA. Up to 25% of all NFIP flood losses arise from outside SFHAs (B, C, and X Zones).

Under federal regulations, the required coverage must equal the amount of the loan (excluding appraised value of the land) or the maximum amount of insurance available from the NFIP, whichever is less. The maximum amount of coverage available for a single-family residence is $250,000 and for non-residential (commercial) buildings is $500,000. Federal agencies and regulators, including government-sponsored enterprises, such as Freddie Mac and Fannie Mae, may have stricter requirements.

---

Preparing for your CRS Verification Visit

The Community: Preparing for your Visit

- Read through the letter and list of needed documentation sent by the Specialist (Crosswalk)
- Familiarize yourself with the organization of the 2013 CRS Coordinator’s Manual: Especially the Activities you are receiving credit for
- Contact other Staff members:
  - Engineers
  - Stormwater Managers
  - Emergency Operations Officer
  - GIS department
  - Other Agencies
  - Maybe other CRS communities

**Note:** Please advise me if any of the above information is incorrect.

**Activity 230 - Community Program Data:**
- Complete as much of page CC-213-2 as possible. At a minimum, lines 6 and 13 and the 16th line “Period Covered” are required to be completed. The instructions to fill out the form are on pages CC-213-3 and CC-213-4 (See Appendix E).
- Provide a parcel map of the community with a floodplain overlay and include a legend.

**Activity 310 - Elevation Certificates:**
- Please send a list/report of permits identified by address for only finished new buildings built or substantially improved in the Special Flood Hazard Area (SFHA) since the last cycle visit (March 11, 2009). Please include the source and date range of the list.
- Omit from the list permits for structures not in the SFHA (verify item 8 with 2 zones).
Preparing for your CRS Verification Visit

If the documentation has not already been being compiled, begin compiling and organizing documentation immediately after receiving the visit letter and list of documentation. (Please do not forget about the documentation required 60 days prior to the meeting date.)

Preparing for your CRS Verification Visit

The Community: Preparing for your Visit

Where to find answers?

• The 2013 CRS Coordinator’s Manual (link: http://crsresources.org/)

• Activity Summary Page (first page of each Activity’s section)
Preparing for your CRS Verification Visit

320 MAP INFORMATION SERVICE

The objective of this activity is to provide inquirers with information about the local flood hazard and about flood-prone areas that need special protection because of their natural functions.

321 Background

Maps are an effective method of communicating information about flood hazards. Residents and businesses that are aware of potential flood hazards can take steps to avoid problems and/or reduce their exposure to flooding. Communities are the best source of maps because they can often supplement and clarify the Flood Insurance Rate Map (FIRM) with complementary maps, and with information on additional hazards, flooding outside mapped areas, development regulations that affect floodplain properties, flood insurance, natural floodplain functions, and property protection measures.

A map information service can greatly help a community’s residents as well as its banks, insurance agents, real estate agents, and anyone else who needs flood hazard information. This public service is particularly helpful to those who have trouble reading maps, people from out of town, and those who do not have access to the latest maps or all the hazard information available in the community.

This activity is also intended to bring other available community resources to bear on each individual situation. Such resources include local topographic, planning, road, and utility maps, geographic information systems (GISs), maps of special flood-related hazard areas, permit records, and subdivision plats. Where they are available, these other resources can complement the FIRM as sources of additional flood data or more detailed map information.

321.b. Activity Credit Criteria

1. MI1, providing information from the FIRM needed to write a flood insurance policy, is a prerequisite to receiving other credit under this activity.

2. The map information service must be able to locate a property based on a street address. There is no credit if an inquirer is given a map to read. One of the reasons for this credit is that some people have difficulty reading maps.

3. The information must be volunteered when there is an inquiry. For example, an inquirer about a property that is located in a Special Flood Hazard Area (SFHA) needs to be told about the mandatory flood insurance purchase requirement. If the community wants credit for MI6, historical flood information, the inquirer must also be told whether the area has been flooded in the past, even if he or she did not ask.

322 Elements

322.a. Basic FIRM Information (MI1)

The maximum credit for this element is 30 points.

MI1 credits providing basic information found on a FIRM that is needed to accurately rate a flood insurance policy.

Credit Criteria

1. The activity credit criteria in Section 321.b must be met.

2. If requested, the community must provide all of the following FIRM information:
   a. Whether the property is in an SFHA.
   b. The community number.
   c. The panel number and suffix.
   d. The date of the FIRM’s index (cover panel).
   e. The FIRM zone, e.g., A, C, X, V, AE, A2, AO, etc.
   f. The base flood elevation (the depth in AO Zones) where shown on the FIRM, and
   g. The elevation datum used on the FIRM, if other than NGVD.
Preparing for your CRS Verification Visit

323 Impact Adjustment

There is no impact adjustment for MI1 and MI2. For MI1 and MI2, the community must provide the map information for all areas shown on the FIRM.

For MI3 through MI7, the impact adjustment is calculated as described below.

\[
r_{MI} = \frac{a_{MI}}{a_{SFHA}}
\]

- \(a_{MI}\) = the area covered by the map information service, and
- \(a_{SFHA}\) = the area of the SFHA

If \(r_{MI} < 0.1\), then \(r_{MI} = 0.1\)

\(a_{MI}\) represents the area covered by the service under MI3 through MI7. Estimates of the areas affected by a service can be used. The area of the SFHA must be the same number submitted with the most recent floodplain data table (see Section 213.a).

In most cases, \(a_{MI}\) will be equal to \(a_{SFHA}\), but there may be instances in which the community wants to provide the public with information on only some of its mapped flood problem areas. In these cases, as explained in Section 213.a.

324 Credit Calculation

For MI4, the area of SFHA is \(a_{SFHA}\) for MI3 through MI7. Elevations, such as areas

\[
c_{320} = MI1 + MI2 + (MI3 \times r_{MI3}) + (MI4 \times r_{MI4}) + (MI5 \times r_{MI5}) + (MI6 \times r_{MI6}) + (MI7 \times r_{MI7})
\]
Preparing for your CRS Verification Visit

### Documentation Provided by the Community

a. At each verification visit,

   (1) Documentation that shows how the community publicizes the service each year (see Section 321.b, activity credit criterion (6)).

   If the community publicizes this service through an annual outreach project credited under Activity 330, the publicity materials may be included with the documentation for Activity 330. There must be a notation (e.g., “320”) in the margin of the portion of the outreach project where the map information service is addressed.

### For More Information

a. Additional information, reference materials, and examples can be found at [www.CRSresources.org/300](http://www.CRSresources.org/300).

b. Copies of the following booklets are available free, singly and in quantity (see Appendix C).

### Related Activities under the Community Rating System

- Credit under Activity 320 is provided for explaining map information to the public. Credit for additional map data (AMD) under Activity 440 (Flood Data Maintenance) is provided for maintaining and updating the data. A community can get either credit without getting credit for the other.

- If an inquirer wants to know more about the flood hazard, flood insurance, and/or protecting natural floodplain functions, the community should have resources available to answer those questions. Such resources are credited by the CRS under Activity 350 (Flood Protection Information), Activity 360 (Flood Protection Assistance), and Activity 370 (Flood Insurance Promotion).

- If the community develops a Program for Public Information (credited under Activity...
Preparing for your CRS Verification Visit

The Community CRS Coordinator

The CRS Coordinator is the person designated by a community’s Chief Executive Officer to be the official point of contact between the community and the program staff of the Community Rating System. The CRS does not have specific requirements for the CRS Coordinator position, but communities can consider the following guidelines.

Qualifications

• The CRS Coordinator should be familiar with the National Flood Insurance Program and the community’s floodplain management activities.
• The person will need to be recognized as speaking for the CEO when documentation and assistance are requested from the various community offices and departments.
• The person does not have to be a community employee. Communities have had successful CRS Coordinators who have been employees, elected officials, staff from a regional agency, contractors and citizen volunteers. However, the CRS Coordinator does need the confidence of the CEO and must be authorized to sign CRS-related documents on behalf of the community.

Duties

• Become familiar with the CRS’s operation, prerequisites, and credited activities.
• Assemble, coordinate, and maintain the documentation for the community’s CRS application, modifications, cycle verification visits, and annual recertifications.
• Complete and sign the community’s CRS Activity Worksheets.
• Coordinate verification visits with the ISO/CRS Specialist. This includes lining up representatives from the offices that implement the credited activities so that they can participate in the visit.

Recommendations

Most, if not all, CRS-credited activities are implemented not by the CRS Coordinator but rather by other offices and departments. Getting the needed documentation and other cooperation from those offices is vital. An effective CRS Coordinator should know what the other offices do and be able to work with them.
Preparing for your CRS Verification Visit

The Community: Preparing for your Visit

- Coordinate with other staff to join us during the verification visit if needed.
- Visit the CRS Resources website: http://crsresources.org/
- Contact your ISO/CRS Specialist (See 100 Series area on website)

100 Series: Introduction
ISO/CRS Specialists and FEMA CRS Contacts
ISO/CRS Specialists are responsible for reviewing community requests for Community Rating System classification and verifying implementation of activities credited by the CRS. The name and telephone number of the ISO/CRS Specialist for a state are listed below. The ISO/CRS Specialist is an employee of Insurance Services Office, Inc. (ISO), FEMA’s CRS management contractor.

- Digital or Hard Copy? (Ask your ISO/CRS Specialist)
Preparing for your CRS Verification Visit

Test Questions:
1. Where can you find out the name and contact information of your CRS Specialist?

2. Where can you find the 2013 CRS Coordinator’s Manual?
Preparing for your CRS Verification Visit

Helpful Hints

• Keep your CRS program organized

• Carefully review all EC’s for accuracy and completeness

• Prepare documentation requested 60 days prior to the visit first
• Submit other material prior to the visit (Technical Reviews)
• Stay in contact with your Specialist
• Attend an EMI – CRS course (E278 or L278)
Preparing for your CRS Verification Visit

Helpful Hints
Pay special attention to:

- Permit List and Elevations Certificates
- Look at your entire outreach project program
- Activity 510 Floodplain Management Plans
- Develop your Activity 540 material ASAP
- If applying for any 600 series activity, contact your ISO/CRS Specialist
Preparing for your CRS Verification Visit

Helpful Hints
Day of the Visit

Clear your calendar

CRS should be your main focus that day

We will cover all activities

If requested by the CRS Specialist, have a staff person for field work
Preparing for your CRS Verification Visit
