Glossary of Terms

Direct Costs - Costs that can be identified specifically with a particular final cost objective, such as a federal award, or other internally or externally funded activity, or that can be directly assigned to such activities relatively easily with a high degree of accuracy.

Indirect Costs - Usually classified within two board categories: Facilities and Administration.

- 1. Facilities is defined as depreciation on buildings, equipment and capital improvement, interest on debt associated with certain buildings, equipment, and capital improvement and operations and maintenance expenses.
- 2. Administration is defined as general administration and general expenses such as the director's office, accounting, personnel, and all other types of expenditures not listed specifically under one of the subcategories of Facilities. These costs cannot be easily assigned to a particular cost objective. This category has been referred to as the cost of doing business.

In order to associate these costs to a particular grant, an agency/organization must complete an indirect rate calculation and have it approved by their cognizant (federal agency that provides the majority of their

grant funding/money) agency in order to recover some of the costs of these expenses.

31. When seeking reimbursement of expenses, the subrecipient is required to provide signed invoices. The individual noted below has the authority, on behalf of the subrecipient, to certify and serve as the signatory on invoices related to this project. By signing the invoice, Certifying Officials are acknowledging review of invoices to ensure expenses included in the invoice are consistent with the agreement, all services and costs documented on the invoices are accurate and eligible, and all subrecipient and contractors have been fully paid.

Cost Allocation Plan - A cost is allocable to a particular federal award or other cost objective if the goods or services involved are chargeable or assignable to that federal award or cost objective in accordance with the relative benefits received. If a cost benefits two or more projects or activities in proportions that can be determined without undue effort or cost, the cost must be allocated to the projects based on proportional

benefits. The basis for determining the proportional benefits and therefore the proportional costs is a cost allocation plan that must be approved by the subrecipient's cognizant federal agency (see Indirect Cost).

34. Does the subrecipient have a cost allocation plan (2CFR 200.405 - Allocable Cost)?

Yes

No
